Denver, CO 80290
303-894-2200 ext. 6318

Dear Mr. Gardner:

Per the request of Sequoia Voting Systems, we are resending you an encrypted CD with the Elections Night Results application for the server and client systems as directed by Chris York, Quality Manager @ Sequoia. It was determined that the CD shipped on 06-28-07 did not contain all the files needed to install this functionality.

- Election Reporting 1.1.7.0
 - Server set up /installs
 - Client/Workstation set up/installs
- Election Results 1.1.1.0
 - Server set up /installs
 - Client/Workstation set up/installs

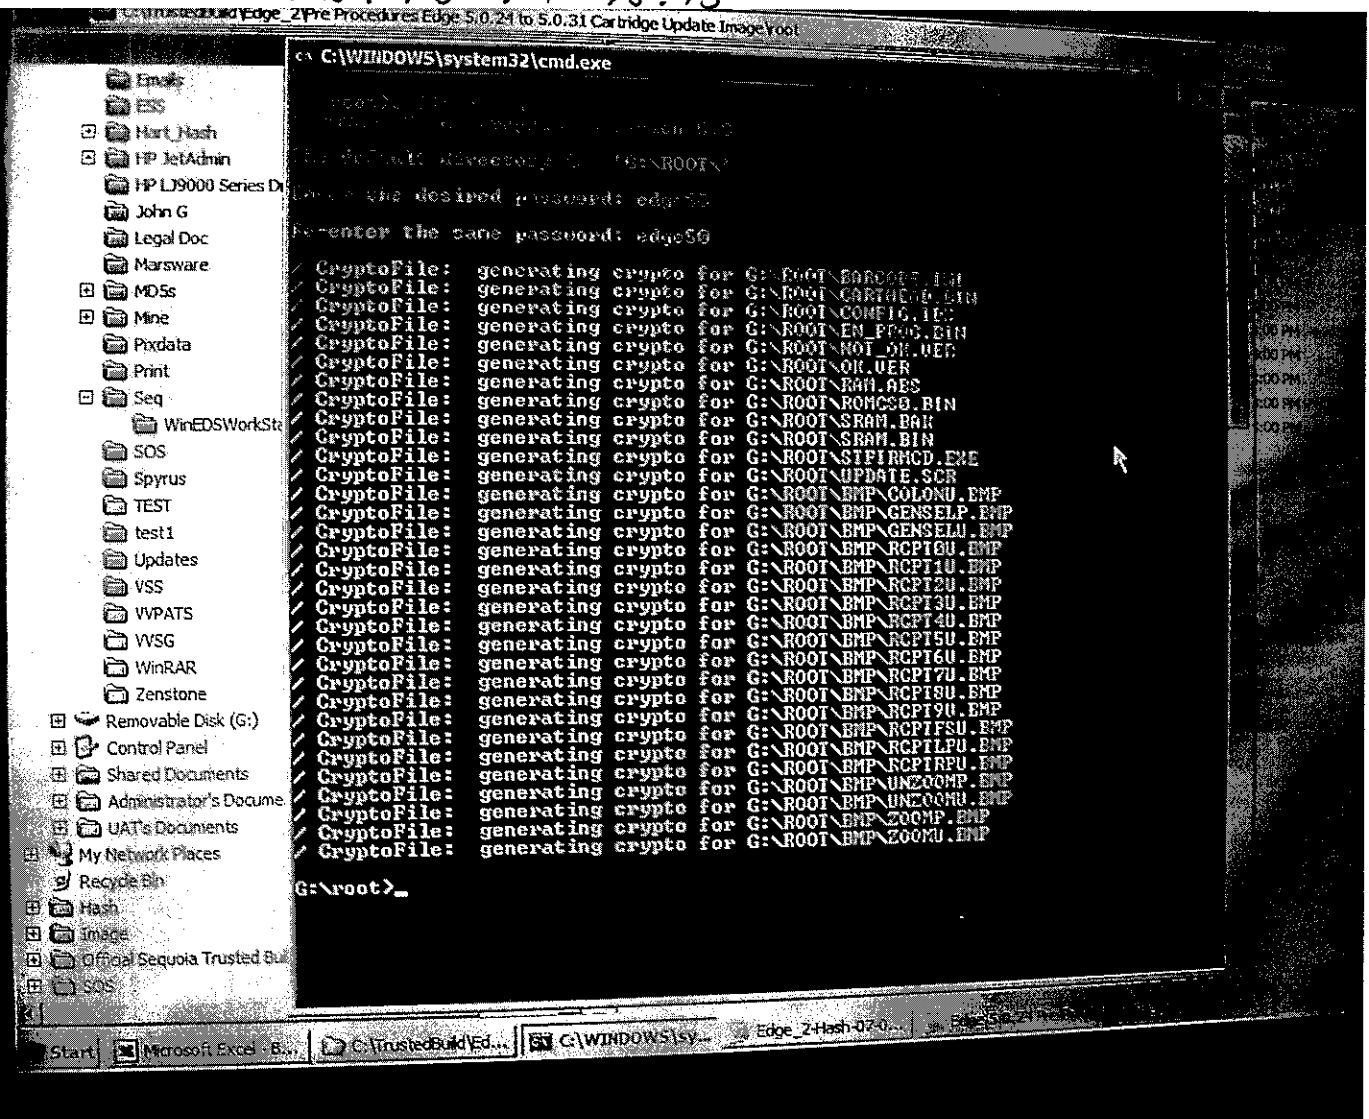

Please note that this information is Proprietary and should be treated as Confidential.

Sincerely,
Kelly Rohacek
CIBER ITA Practice Director

CDOS Certification Number: **2007-CDOS-SEQ-001-0403**

Manufacturer: *Sequoia*

Application Date: *04/03/2007*

Test Number

AD3-P3 - 301

{This page intentionally left blank}

Rule or Statute	2007-CDOS-SEQ-001-0403	Test Number
45.5.2.3.12	The voting system shall allow the system administrative account to verify that the software installed is the certified software by comparing it to the trusted build or other reference information.	AD3-P3-301
		Test Date
		6/11/2007
		Test End Date/Time
		8/27/2007
Cross Reference 1		Test Type (D,F,B)
		Functional
Cross Reference 2		Eq Type
		CCOS
Cross Reference 3		Equipment Model
		400-C
		Serial number
		N/A
		Manufacturer
		Sequoia

Purpose:

The purpose of this test is to verify that the administrative account has the ability to verify and/or view the trusted build information loaded on the device, to the referenced trusted build.

Prerequisites:

AD3-P3-302

Test Procedures:

Use notes and instructions from AD3-P3-302 to verify the trusted build information using the administrative account of the voting device.

Variances Used During Testing:

N/A

Test Expected Outcome

System Administrative account has permissions to allow verification of trusted build against installed build.

Test Log

The test log shall contain procedural steps used to conduct and evaluate the tests. At a minimum, these procedural steps shall include any items related to the setup, start, process, measurements, shut down, retarding, stop and restoring the system as necessary.

[illegible]

Additional Observations and Findings

Observations:

See extensive video records generated for the trusted build of Sequoia's system, and the notes on AD3-P3-302. The voting devices (400-C and Workstation) do not have the ability for the administrator or any other user to "verify" the software trusted build of the system. All systems will require a complete LOAD of the trusted build after any security incident, maintenance, or loss of chain of custody during the life of the device.

Findings:

The voting system does not meet the test requirements.

<i>Rule or Statute</i>	2007-CDOS-SEQ-001-0403	<i>Test Number</i>
45.6.2.1.3	The proprietary software shall be installed on the workstation/server and all applicable voting system components by the testing board following the verification of the trusted build, and using the procedures provided by the voting system provider. After installation, the software and firmware shall be verified to the trusted build hash values.	AD3-P3-302
		<i>Test Date</i>
		6/11/2007
		<i>Test End Date/Time</i>
		8/27/2007
<i>Cross Reference 1</i>		<i>Test Type (D,F,B)</i>
		Functional
		<i>Eq Type</i>
<i>Cross Reference 2</i>		CCOS
		<i>Equipment Model</i>
		400-C
<i>Cross Reference 3</i>		<i>Serial Number</i>
		N/A
		<i>Manufacturer</i>
		Sequoia

Purpose:

The purpose of this test is to document and verify that the voting system device(s) meet the requirements of trusted build by first: 1) match values to VSTL/NSRL values, 2) load the device, and 3) verify the loaded device.

Prerequisites:

N/A

Test Procedures:

Document findings related to the verification, loading, and re-verify loaded device with the trusted build information.

Variances Used During Testing:

N/A

Test Expected Outcome

The testing board members successfully installed the "Trusted Build", and verified the values on the device back to the VSTL/NSRL values.

Environment		2007-CDOS-SEQ-001-0403		Test Number
ction - Voting - Post				AD3-P3 - 302
Date	Time	Operator	Activities and Entries	Incident Reports
6/14	1:20		Inspect, VERIFY EISA CONFIGURATION 39 MB.	
			VERIFIED PHYSICAL HARD DRIVES. Rebooted & LAUNCHED Setup w/ Format & Delete of partitions by booting to disk.	
	2:20		VERIFIED WITH VENDOR THAT CD WINDOWS INSTALL DISK WAS BAD	
	2:50		STOPPING 400-C due to CD-ROM ERROR by VENDOR - will RESUME when we have disk.	
6/15	8:20 AM		Continue work on 400-C. OS install.	
			STOP - 400-C was tested with WINDOWS 2000 on it - Sent this back to SEDVIA to determine if HIA documentation is wrong, or if vendor wants to use HIA (shown) tested installs.	
	9:05		Moving on to Laptop (section 4)	
	2:00		Back to Count - Vendor providing updated Wyle Report showing Win XP was tested on device.	
			Finished installing OS, Hashed C Drive. Save as: "400-C - Hash 061507.txt"	
			→ 11,850 / 767 DIRECTORIES.	
			FROM TRUSTED BUILD 1740 FILES, 86 DIR. Burned Trusted build files to CD Installed on 400-C	
	2:50		Re Hash C Drive AFTER install.	
			Turns out that this is actually list of source code files - the PROGRAM files only make up just 25 files.	

Environment		2007-CDOS-SEQ-001-0403		Test Number
ction - Voting - Post				AD3-P3 - 302
Test Log				
The test log shall contain procedural steps used to conduct and evaluate the tests. At a minimum, these procedural steps shall include any items related to the setup, start, process, measurements, shut down, retarting, stop and restoring the system as necessary.				
Date	Time	Operator	Activities and Entries	Incident Reports
4/29	15:30	kg	Rebuild server to WIN 2K - ENTRIES ARE LISTED IN AD4-P3-401.	
			Pulled TB FILES from SURCASE.	
			Compared hash values ^{IT} TRUSTED BOLD 27 FILES	
	16:00		Hashed server. Hash 400C to OS hash 062907	
			- 7424 files - 426 DIRECTORIES) INITIAL	
7-2	11:15A	kg	SEARCH for INSTALL files. USED WYLD disk that has source code files on it.	
			1940 FILES, INCLUDES "SETUP" FILES & INSTALL FILES. APPARENTLY setup generates the five 27 files running on the system.	
			hashed 13 files (initial) to its hash values.	
			copy install files onto CDROM	
	11:45A	kg	DEVELOPED XLS SPREADSHEET to SEARCH WITH EXTRA HEMS THAT TRUSTED BOLD installed.	
7-3	1:45	kg	SEARCHED WYLD to provide hash values of 22 files. That were installed but not part of TRUSTED BOLD.	
			Due to Vendor not delivering the hash values, the system will only be capable of being loaded from state trusted bold but not verified. Also Vendor confirmed that all field units are running Windows XP also requiring a rebuild of the servers. Sealed & initialed the device.

Additional Observations and Findings

Observations:

See extensive video records generated for the trusted build process. The voting system provider supplied the testing board with all the information, however the loading of the device turned up more files than what was provided to verify. The vendor agreed that the system would not be capable of being verified, but would require a complete load of the information upon any security incident, maintenance, or other loss of chain of custody during the life of the device.

Findings:

The voting system does not meet the test requirements.

Subject: RE: Schedule

Ed, just to let you know where things stand, the 400-C is up and running now. We have processed the administrative codes that you provided and the insights are both running.

Margie was unable to get the advantage to run. She attempted to load the driver but the driver apparently did not work. She indicated she would be back today to have the correct driver for us. We haven't heard back on this issue since. The Advantage is still unable to be used.

We are also still waiting for the information that you mentioned providing on the INI files. Do you have that coming to us? The edge 2 and Edge 2 Plus are still sitting idle.

Thanks,
John G.

John,

I hear that the 400C is up again. Can you confirm?

Also, have you had good luck with the Insight?

Thanks,
Ed

Subject: Schedule

Hi John,

I don't want to hold your team up, so unless I hear differently, I will plan to come by to load the Advantage drivers at 2:00 this afternoon.

Thanks,

Margie

CDOS Certification Number: **2007-CDOS-SEQ-001-0403**

Manufacturer: *Sequoia*

Application Date: *04/03/2007*

Test Number

AD4-P3 - 401

{This page intentionally left blank}

<i>Rule or Statute</i>	2007-CDOS-SEQ-001-0403	<i>Test Number</i>
45.6.2.1.3	The proprietary software shall be installed on the workstation/server and all applicable voting system components by the testing board following the verification of the trusted build, and using the procedures provided by the voting system provider. After installation, the software and firmware shall be verified to the trusted build hash values.	AD4-P3-401
		<i>Test Date</i>
		6/11/2007
		<i>Test End Date/Time</i>
		8/27/2007
<i>Cross Reference 1</i>		<i>Test Type (D,F,B)</i>
		Functional
<i>Cross Reference 2</i>		<i>Eq Type</i>
		Software
<i>Cross Reference 3</i>		<i>Equipment Model</i>
		WinEDS 3.1.074
		<i>Serial number</i>
		N/A
		<i>Manufacturer</i>
		Sequoia

Purpose:

The purpose of this test is to document and verify that the voting system device(s) meet the requirements of trusted build by first: 1) match values to VSTL/NSRL values, 2) load the device, and 3) verify the loaded device.

Prerequisites:

N/A

Test Procedures:

Document findings related to the verification, loading, and re-verify loaded device with the trusted build information.

Variances Used During Testing:

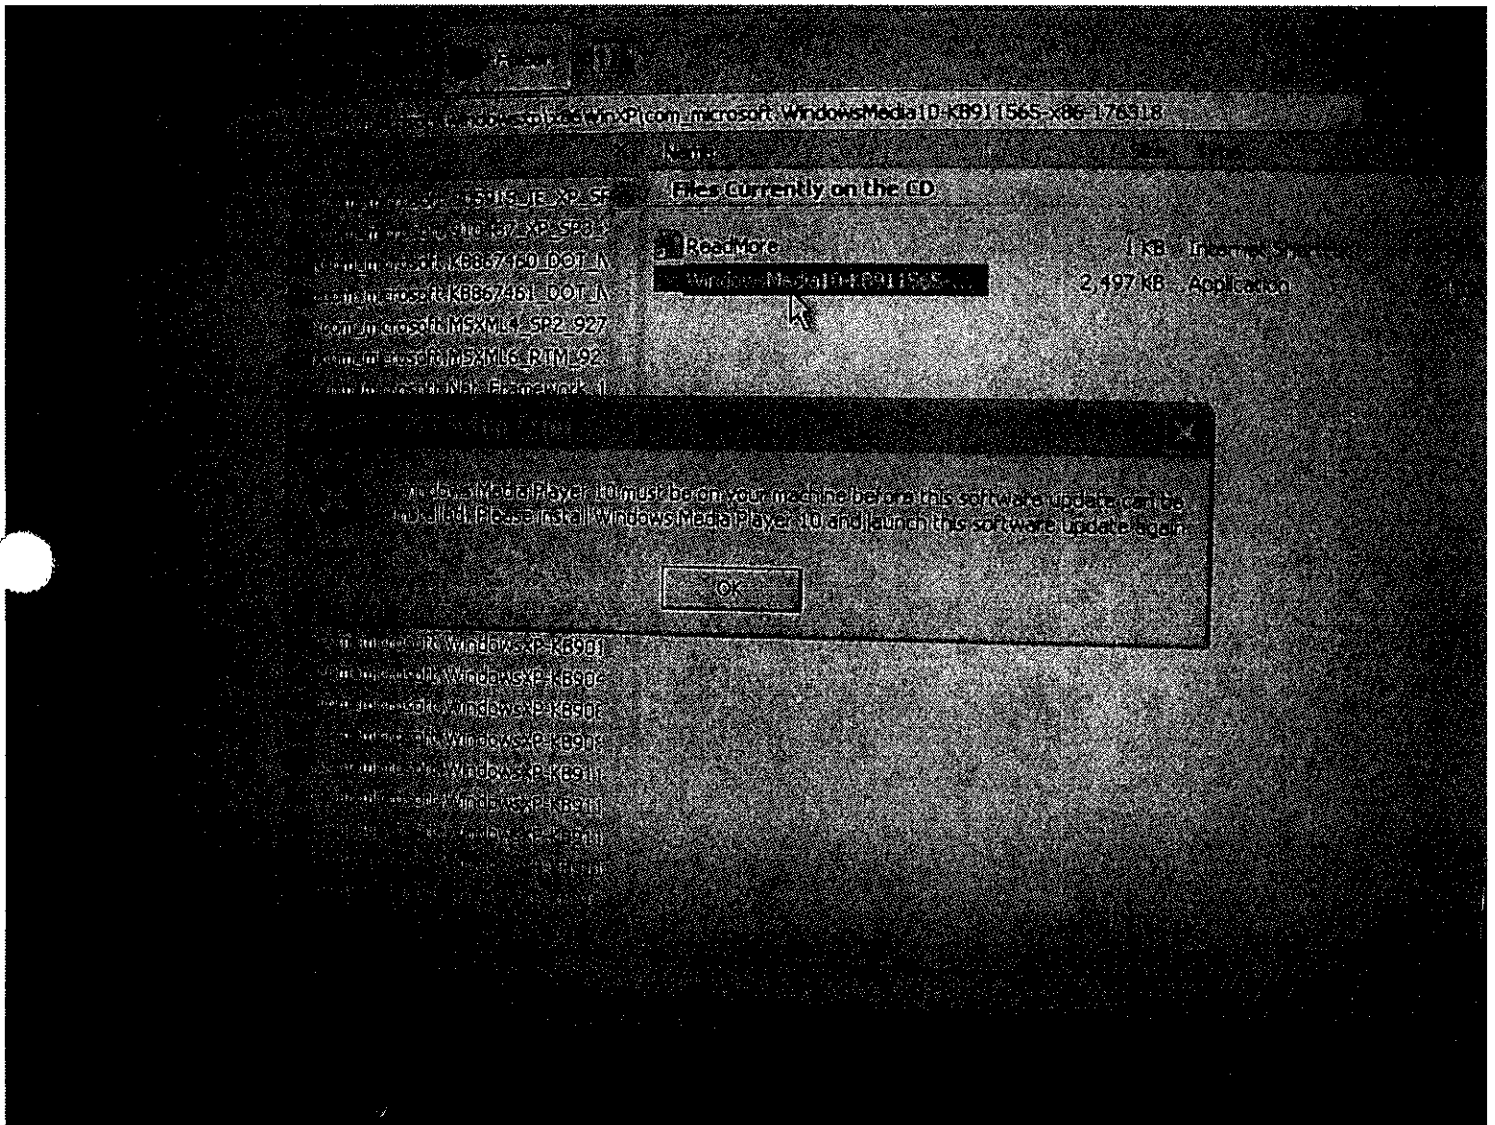

N/A

Test Expected Outcome

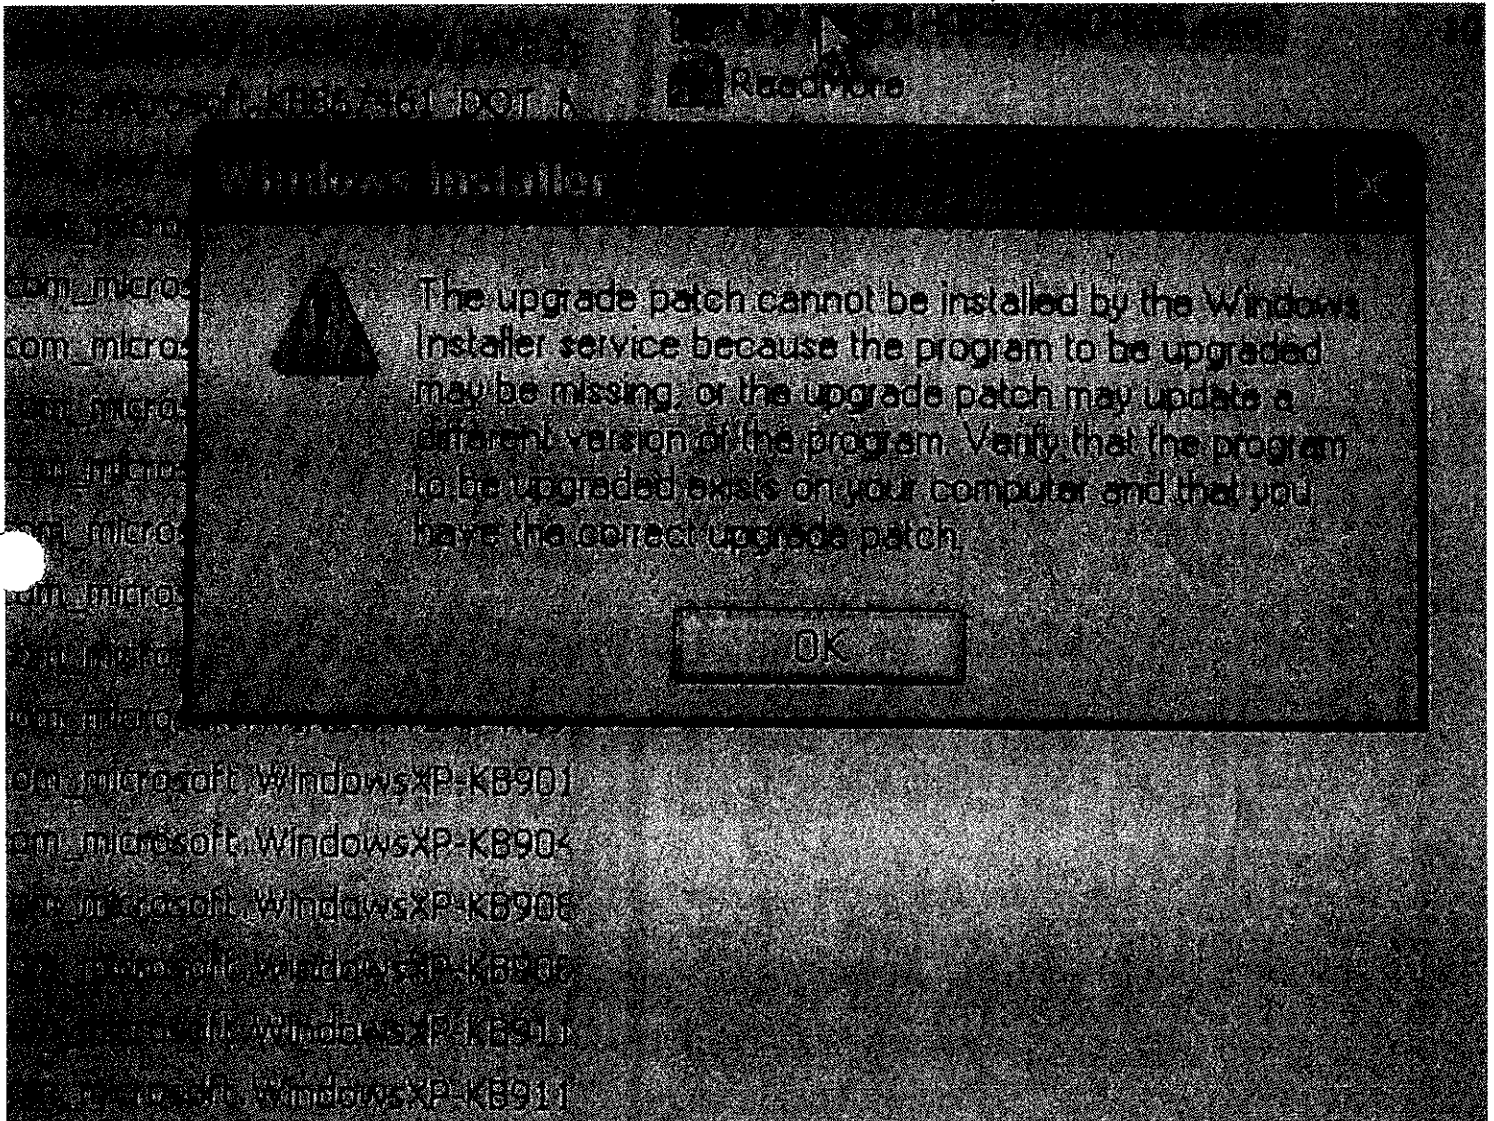

The testing board members successfully installed the "Trusted Build", and verified the values on the device back to the VSTL/NSRL values.

 Signature	 Date	 Signature	 Date	 Signature	 Date

Additional Observations and Findings

Observations:

See extensive video records and notes in this test generated for the trusted build process. The voting system provider supplied the testing board with all the information, however the loading of the device turned up more files than what was provided to verify. The vendor agreed that the system would not be capable of being verified, but would require a complete load of the information upon any security incident, maintenance, or other loss of chain of custody during the life of the device.

Findings:

The voting system does not meet the test requirements.

Additional Observations and Findings

Observations:

See extensive video records generated for the trusted build of Sequoia's system, and the notes on AD4-P3-401. The voting system software components do not have the ability for the administrator or any other user to "verify" the software trusted build of the system. All systems will require a complete LOAD of the trusted build after any security incident, maintenance, or loss of chain of custody during the life of the device.

Findings:

The voting system does not meet the test requirements.

Additional Observations and Findings

Observations:

All information was provided to the state as required on write-once media. See the trusted build suitcase for the Sequoia voting system. Additional documentation and correspondence is located at the back of the binders.

Findings:

The voting system provider meets the requirements of this test. All trusted build media were submitted to the state on CD-ROM media and were promptly sealed and secured in storage safe.

Wyle Letter No. 51884B-090

May 2, 2007

John Gardner
Voting System Specialist
Colorado Secretary of State
1700 Broadway, Suite 270
Denver, CO 80290

Subject: Hash Codes for Sequoia CD sent 04-27-07

Dear Mr. Gardner:

This letter contains the Hash Codes for the Sequoia source code and executable files that Wyle sent to you on a CD on 04-27-07. These files were encrypted into a single file, "To Colorado 042607.sda.exe," which contains the following:

- 400-C/WinETP Firmware Version 1.14.3
- AVC Edge & Card Activator Firmware Version 5.0.31
- Optech Insight APX K2.12, HPX K1.44
- Memory Pack Reader (MPR) Firmware Version 2.15

Below are the individual Hash Code and folder/version for each file on the CD:

Ed, do you have an update for us? We are now stopped on the 400C because a paper guide broke off the feeder wheel assembly today.

Can you help us get moving again and help us with these issues?

Thanks,
John G.

Ed, I am available anytime tonight.

We are currently stopped on the insights due to error messages on both now, stopped on edge 2's because of ini files, and stopped on advantage because of no cartridges or programmer to program cartridges.

We are working the 400c and software tests, but have lots of resources available to test items that we can't test.

Any help on these items would be great.

Thanks,
John G.

Subject: Issues to be resolved

Ed, just so you know we are almost to a standstill with equipment. We have not heard back on the INI issues (can't test DRE machines without this resolved), and the 2 insight machines have a log file that is full. Can these machines not handle more than 5,000 ballots?

Any idea when we will hear back on these two issues?

Thanks,
John G.

Subject: RE: Schedule

Ed, the insights are running, but apparently this log will become full at around 5,000 ballots. Do you have any specifications on the size of the memory bank holding this log?

We do have the advantage running, but we expressed concern that some counties are using the advantage and will need this driver. Since we experienced a problem with the driver with the load of your software, will the counties that are using the advantage experience the same problem? We are also researching the impact of adding a file to the trusted build that is not trusted. This may cause some complications, as we were unaware that a sequoia file would need to be applied which modified the software.

Can you please check to see if the advantage driver and settings could be applied prior to loading the trusted build software?

Thanks,
John G.

Ed, just to let you know where things stand, the 400-C is up and running now. We have processed the administrative codes that you provided and the insights are both running.

Margie was unable to get the advantage to run. She attempted to load the driver but the driver apparently did not work. She indicated she would be back today to have the correct driver for us. We haven't heard back on this issue since. The Advantage is still unable to be used.

We are also still waiting for the information that you mentioned providing on the INI files. Do you have that coming to us? The edge 2 and Edge 2 Plus are still sitting idle.

Thanks,
John G.

Subject: 400C Maintenance Manual and MPR Chip Manufacturer

John,

Gerome said that the 400C was starting to jam and the problem is most likely dirty rollers at the read head. I've attached a copy of the 400C Maintenance Manual which has the detailed procedure for cleaning the 400C. I'm also bringing over some more Insight paper rolls this morning and will bring a hard copy of this document for your reference.

Chad had asked for a supplier of the programmable chips for the MPR. These chips can be bought from www.digikey.com. The Digikey part number is [REDACTED] and the manufacturer part number is [REDACTED]

To: 'Green, Sandy'; York, Chris
Cc: Smith, Ed; pa_nolte@msn.com; Tim Bishop; Bernard Konkol; Michael Chadwell
Subject: RE: Sequoia Trusted Build Process

Sandy, the notice of adoption of the new certification requirements and the 21 page pre-amble were e-mailed to your certification officers for review on 3/16/2007. This is the original e-mail which generated the request for an application to certify in the 2007 election cycle. From that document are the following statements:

The Secretary of State will create a trusted build for systems certified for use in Colorado where the VSTL or EAC has not already created a trusted build. (page 6)

The Secretary of State will be using the Colorado trusted build and shall install, witness and document the verification of the build for all equipment used in the State. (page 7)

The expert panel suggested that the Secretary of State adopt federal guidelines for the establishment and distribution of a trusted build version of a voting system used for testing. Having the capability to test the same build version of the software that VSTL labs are using for testing is imperative to maintaining the public confidence in DREs. (page 18)

"Trusted Build" means the write-once installation disk or disks for software and firmware for which the Secretary of State or his/her agent has established the chain of evidence to the building of a disk, which is then used to establish and/or re-establish the chain of custody of any component of the voting system which contains firmware or software. The trusted build is the origin of the chain of evidence for any software and firmware component of the voting system. (page 26)

45.4.7 If the EAC does not have a trusted build for the voting system submitted for certification, the voting system provider shall coordinate with the Secretary of State for the establishment of the trusted build. At a minimum this shall include a compilation of files placed on write-once media for which the Secretary of State has observed the chain of evidence from time of source code compilation through delivery, and an established hash file distributed from a VSTL or the National Software Reference Library to compare federally certified versions against. (page 28)

45.6.2.1.3 The proprietary software shall be installed on the workstation/server and all applicable voting system components by the testing board following the verification of the trusted build, and using the procedures provided by the voting system provider. After installation, the software and firmware shall be verified to the trusted build hash values. (page 63)

I hope this answers your questions on the trusted build process to the degree we have it currently documented. Additional material can be found on our website if you have additional questions.

9:00am on the 11th will be fine.

Thank you,
John G.

Subject: RE: Sequoia Trusted Build Process

John,

Please forward me the requirement for the state to have equipment to verify and install firmware for Sequoia equipment. Also was this information provided before the start of testing and if so please direct me to where I can find this.

I will contact the ITA to ensure you receive the proper documentation and information. I am still working on providing information for the proprietary equipment used to install firmware and hope to have an answer to you later today.

Monday, June 11 is the next time the team is available to continue this process. Does 9 am work for a starting time?

Thanks
Sandy Green

From: John Gardner [mailto:john.gardner@sos.state.co.us]
Sent: Mon 6/4/2007 5:28 PM
To: Green, Sandy; York, Chris
Cc: Smith, Ed; pa_nolte@msn.com; Tim Bishop; Bernard Konkol; Michael Chadwell
Subject: Sequoia Trusted Build Process

Sandy, the following table represents issues outstanding regarding the trusted build. As previously indicated, we are unable to move forward with functional testing until these issues are resolved. In addition to this information, the following needs to be evaluated from ITA Disks:

- 1) Documentation of the CD matching the tested build version for federal qualification (Systest indicated they would provide this, but we need it for the others as well);
- 2) Hash values for all the files on the disks. It was determined unacceptable by the test board to have a hash value for a compressed "packaged" file, when it's possible to receive ITA hash values for all the files contained within the zip/rar file. We would request that all disks are revisited for this.

Status of Trusted builds:

Component:

Trusted Build Complete?

Outstanding Issues:

WinEDS 3.1.074

Unknown - did not verify information. Concerned based on other software hash values.

Election Reporting 1.1.7.0

Unknown - did not verify information. Concerned based on other software hash values.

Election Results 1.1.1.0

Unknown - did not verify information. Concerned based on other software hash values.

WFR 1.0.17.0

Unknown - did not verify information. Concerned based on other software hash values.

AVC Edge II Firmware

Concerned - evaluating Vendor Utility that is not ITA tested, but necessary for trusted build.

Edge 2 Plus Firmware

Hash value included for RAR File, but not for all files. Requesting all files.

Card Activator Firmware

Need PCMCIA Extender to complete.

HAAT Model 50 Firmware

Need Win Image software, concerned about HASH values not being complete.

VeriVote VVPAT Firmware

Interface to upload does not exist for State to complete.

Edge Audio Unit

Need configuration of USB to 4 Pin cable or Sequoia to provide a cable for SOS to use.

400-C Win ETP Firmware

Unknown - did not verify information. Concerned based on other software hash values.

Optech Insight Firmware

?

Optech Insight Firmware

?

Optech Memory Pack Reader Firmware

Chip used had wrong firmware, no compatible chip to burn. Sequoia to return with burnable chip.

As you can see from today's experience, this is not a process that we take lightly, nor are we in a hurry to rush through. While this may be frustrating to you as a vendor, it's important to the state that certain procedures are followed and we ensure that we do this correctly. I hope on your next visit that you plan for ample time to walk through these processes, and do not anticipate that we will finish in one day. We take great care to protect the data disks that have been sent to our office, and do not process them without your representative presence. Therefore, we still have information that has not been verified to be correct, hashed, and open able.

We will continue to approach this one component at a time, as you can see from our progress, each component requires quite a bit of examining ensuring proper configuration and implementation. Based on your conversation at our office, the earliest you would be able to return to complete this process is next Monday - June 11, 2007. This of course will delay the outcome of your certification report by one week. Please let me know if I have misstated this. If correct, please let me know what time on Monday you would like to schedule to begin.

If you have any additional questions on this, please let me know.

Thank you,

John Gardner

Subject: Class of Workstation Submitted for testing

Sandy, it has come to our attention that we have a discrepancy in the class of system that has been submitted to our office for certification. Specifically, our rules require you to do the following:

45.6.1.7 The voting system provider shall provide the same class of workstation and/or server for testing the voting system as the normal production environment for the State of Colorado.

45.6.2.1.1 The voting system provider shall submit for testing the specific system configuration that shall be offered to jurisdictions including the components with which the voting system provider recommends that the system be used.

Your documentation requires the following for the WinEDS Server:

"Dual or Quad Pentium V@1GHz or equivalent (depends on jurisdiction size)

1GB RAM

2x4 GB SCSI II - RAID 0 System drives

2x36 GB SCSI III - RAID 0 Log drives

3x36 GB SCSI III - RAID 5 Data Drives

Windows 2000 or .Net Server with latest service pack

SQL Server 2000 with latest service pack

Microsoft .Net Framework version 1.1 (or later) "

(WINEDS_3_1_Installation_Guide.pdf, page 6)

The system that we received is as follows:

Single Pentium V 3.0 GHz

1GB RAM

Single ATA Drive (size unknown)

Windows Server 2003 Ver. 5.2 SP1

SQL Server 2000 (unable to determine SP)

Microsoft .NET Framework version 1.1.4322.2300

I have highlighted the areas that do not meet the minimum requirements as supplied by your documentation. We will need this situation resolved before moving forward with trusted build and/or

6/6/2007

functional testing as this is clearly a discrepancy within your own documentation and what you have provided to the Secretary of State for Colorado Certification.

Please advise how Sequoia plans to proceed given this discrepancy.

Thank you,

John Gardner

Subject: RE: Sequoia Trusted Build Process

John,

Please forward me the requirement for the state to have equipment to verify and install firmware for Sequoia equipment. Also was this information provided before the start of testing and if so please direct me to where I can find this.

I will contact the ITA to ensure you receive the proper documentation and information. I am still working on providing information for the proprietary equipment used to install firmware and hope to have an answer to you later today.

Monday, June 11 is the next time the team is available to continue this process. Does 9 am work for a starting time?

Thanks
Sandy Green

Subject: Sequoia Trusted Build Process

Sandy, the following table represents issues outstanding regarding the trusted build. As previously indicated, we are unable to move forward with functional testing until these issues are resolved. In addition to this information, the following needs to be evaluated from ITA Disks:

- 1) Documentation of the CD matching the tested build version for federal qualification (Systest indicated they would provide this, but we need it for the others as well);
- 2) Hash values for all the files on the disks. It was determined unacceptable by the test board to have a hash value for a compressed "packaged" file, when it's possible to receive ITA hash values for all the files contained within the zip/rar file. We would request that all disks are revisited for this.

Status of Trusted builds:

Component:

Trusted Build Complete?

Outstanding Issues:

Unknown - did not verify information. Concerned based on other software hash values.

Election Reporting 1.1.7.0

Unknown - did not verify information. Concerned based on other software hash values.

Election Results 1.1.1.0

Unknown - did not verify information. Concerned based on other software hash values.

WFR 1.0.17.0

Unknown - did not verify information. Concerned based on other software hash values.

AVC Edge II Firmware

Concerned - evaluating Vendor Utility that is not ITA tested, but necessary for trusted build.

Edge 2 Plus Firmware

Hash value included for RAR File, but not for all files. Requesting all files.

Card Activator Firmware

Need PCMCIA Extender to complete.

HAAT Model 50 Firmware

Need Win Image software, concerned about HASH values not being complete.

VeriVote VVPAT Firmware

Interface to upload does not exist for State to complete.

Edge Audio Unit

Need configuration of USB to 4 Pin cable or Sequoia to provide a cable for SOS to use.

400-C Win ETP Firmware

Unknown - did not verify information. Concerned based on other software hash values.

Optech Insight Firmware

?

Optech Insight Firmware

?

Optech Memory Pack Reader Firmware

Chip used had wrong firmware, no compatible chip to burn. Sequoia to return with burnable chip.

As you can see from today's experience, this is not a process that we take lightly, nor are we in a hurry to rush through. While this may be frustrating to you as a vendor, it's important to the state that certain procedures are followed and we ensure that we do this correctly. I hope on your next visit that you plan for ample time to walk through these processes, and do not anticipate that we will finish in one day. We take great care to protect the data disks that have been sent to our office, and do not process them without your representative presence. Therefore, we still have information that has not been verified to be correct, hashed, and open able.

We will continue to approach this one component at a time, as you can see from our progress, each component requires quite a bit of examining ensuring proper configuration and implementation. Based on your conversation at our office, the earliest you would be able to return to complete this process is next Monday - June 11, 2007. This of course will delay the outcome of your certification report by one week. Please let me know if I have misstated this. If correct, please let me know what time on Monday you would like to schedule to begin.

If you have any additional questions on this, please let me know.

Thank you,

ohn Gardner

Subject: RE: testing tomorrow?

Sandy, we are still missing some pieces of the trusted build, we do not believe we have the following:

Election Reporting 1.1.7.0

Election Results 1.1.1.0

WFR 1.0.17.0

VeriVote rev 4.3

Edge Audio 5.0 Rev C

Additionally, we are working on contacting either Jennifer Price or Betty (last name illegible) with Ciber as the documentation on the CD does not support the fact that the version we received is in fact the tested, witnessed build from the ITA's. In fact, the CD's from Ciber have hand written labels rather than professionally printed, stamped CD covers.

Our staff is not comfortable with the documentation of these CD's presented in this fashion, particularly being that this CD contains the WinEDS Software.

If you believe that you can rectify these problems by Wednesday, then we would be willing to setup a time to install and verify the trusted builds with you. Let me know what you think.

Thanks,

John Gardner

May 2, 2007

John Gardner
Voting System Specialist
Colorado Secretary of State
1700 Broadway, Suite 270
Denver, CO 80290

Subject: Hash Codes for Sequoia CD sent 04-27-07

Dear Mr. Gardner:

This letter contains the Hash Codes for the Sequoia source code and executable files that Wyle sent to you on a CD on 04-27-07. These files were encrypted into a single file, "To Colorado 042607.sda.exe," which contains the following:

- 400-C/WinETP Firmware Version 1.14.3
- AVC Edge & Card Activator Firmware Version 5.0.31
- Optech Insight APX K2.12, HPX K1.44
- Memory Pack Reader (MPR) Firmware Version 2.15

Below are the individual Hash Code and folder/version for each file on the CD:

MD5 sums generated by FileCheckMD5 version 0.2.1.10

Subject: Wyle Letter 51884B-090 for Sequoia -- Hash Codes

NOTE: This is a corrected version of the letter submitted earlier today.

Mr. Gardner:

Attached is the subject letter concerning the Sequoia CD sent last week.

If you have any questions, please let me know.

John-

I have sent a CD containing source code and executable files to your attention for delivery tomorrow. The passphrase is attached.

If you have any questions, let me know.

Subject: Suggestion

Sandy, just a suggestion....

If you know you are going to go more than 1 day, wouldn't you want to do the demonstration first, and the trusted build second?

John G.
