Abstract

This section defines the purpose of this document. It contains the following sections:

- About this document
- Scope of this document
- Intended audience

About this document

ClearAccess Build Procedure document provides information about how to build the ClearAccess product.

Scope of this document

This section provides summary information about the following aspects of the ClearAccess build process:

- Setting up the build environment
- Installing third-party libraries
- Installing source code
- Building the product

Intended audience

This document is intended for state election officials and their delegated Voting Systems Test Laboratory, as part of the technical data package required to certify the ClearAccess election definition system for use in their state.

1. Setting up the build environment

The ClearAccess system is built using the Microsoft Windows 8.1 operating system. For the build environment, a fresh install of the operating system should be performed.
