## ICX TOUCHSCREEN

1. Setting Up and Opening the Polls
2. Voting on the ICX
3. Accessible Voting on the ICX
4. Voter Card Reactivation
5. Loading the Activation Configuration for ICVA
6. Setting Up The ICX, Pre-Election
7. Closing the ICX Polls

# SETTING UP AND OPENING THE POLLS

## SETUP THE IMAGECAST X

- Remove Each item from storage box and place in the designated area assigned.

# SETUP and POWER ON PRINTER FIRST

- Insert printer cable into top port on the back of the printer. It will fit in the bottom port but **DO NOT** use the bottom port
- Install printer power cord into the back of the printer

# POWER ON THE PRINTER BEFORE ICX

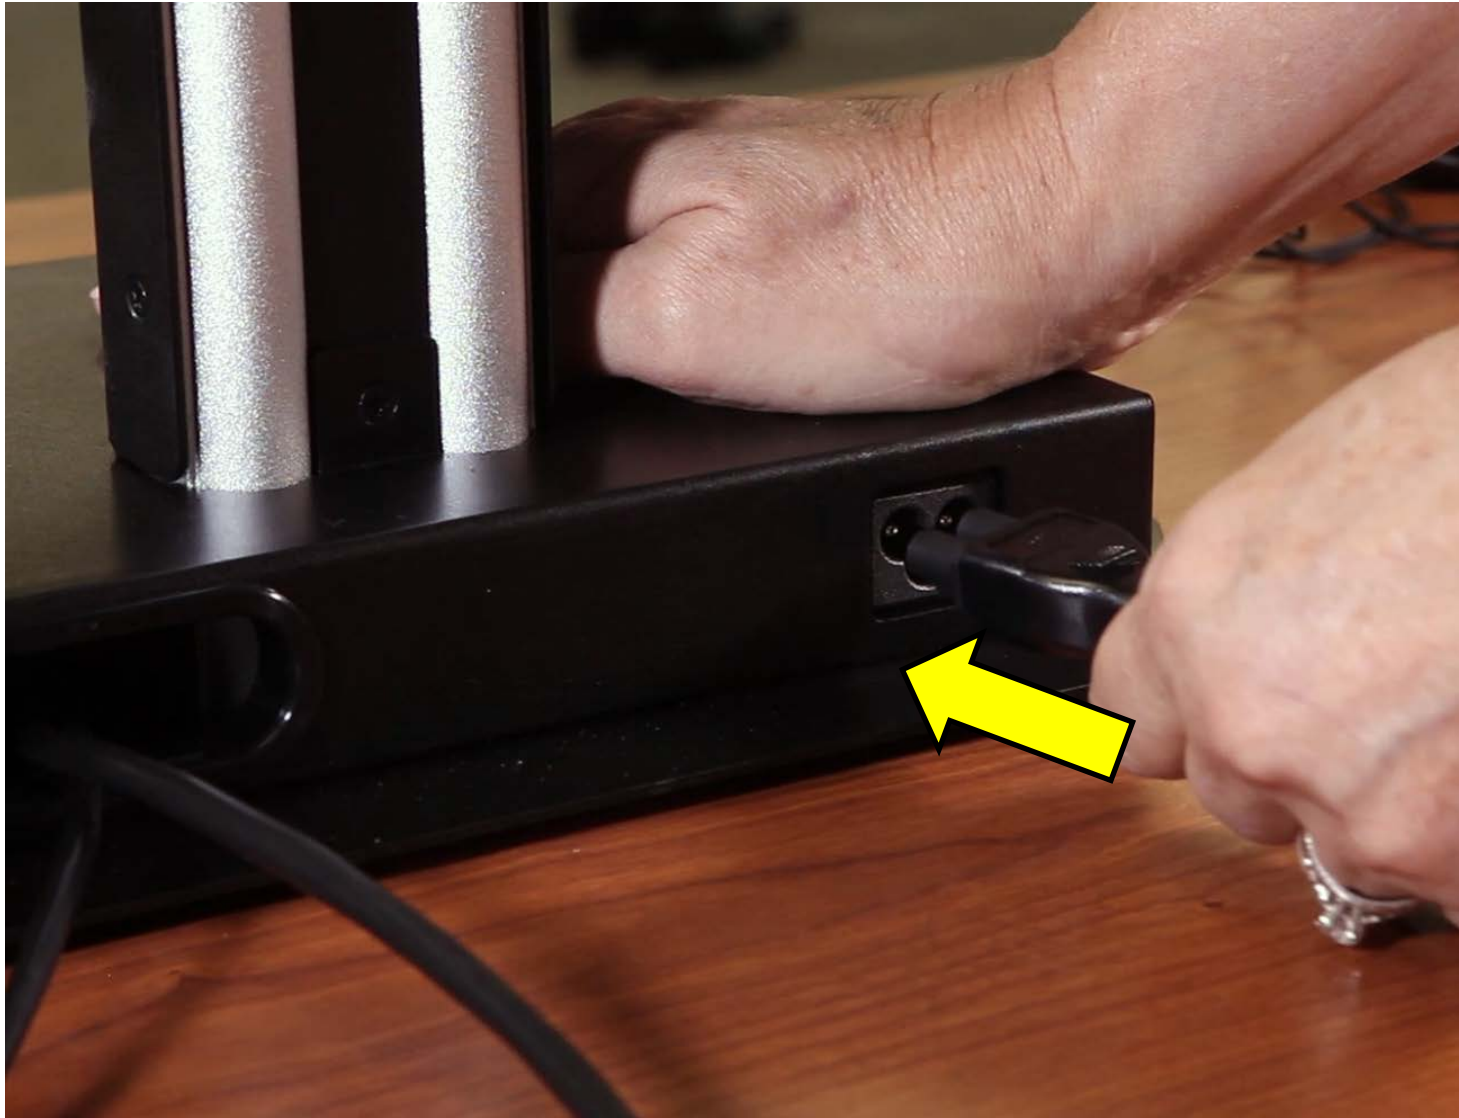

- Load **100 lb. TEXT** paper into the bottom paper tray
- **DO NOT USE REGULAR PRINTER PAPER, THIS COULD CAUSE JAMS IN THE TABULATOR**

- After paper has been loaded, turn the printer on by pressing the POWER button on the front

## SETUP THE ICX

- Ensure that the printer is on and reads “READY” with a green light
- Plug the power cord into the back of the ICX

## POWER ON THE ICX

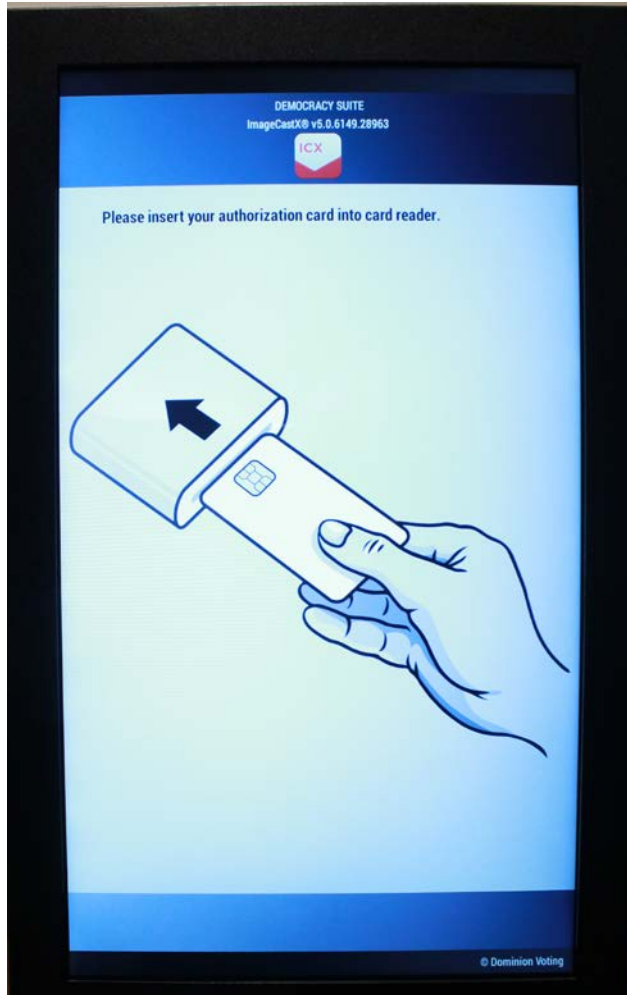

© 2017 Dominion Voting Systems

- Once the power cord has been plugged in, CUT the seal on the bottom door to access the POWER BUTTON
- The power button is under the ICX unit's screen and on the right-hand side
- Briefly press the power button, and it will turn green once it has been activated

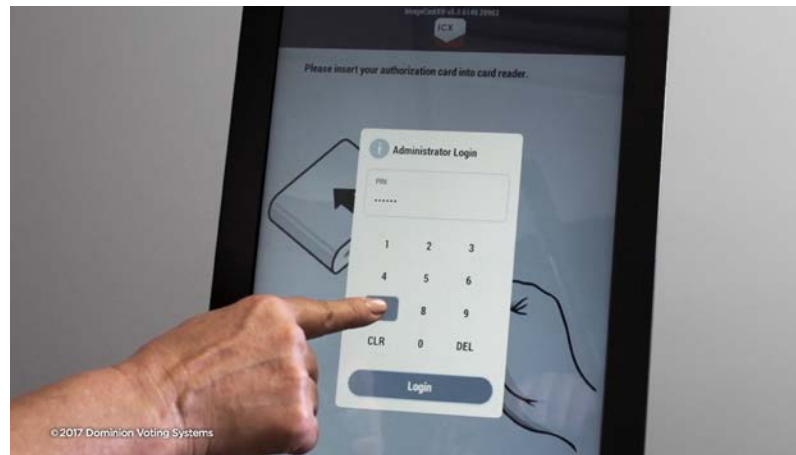

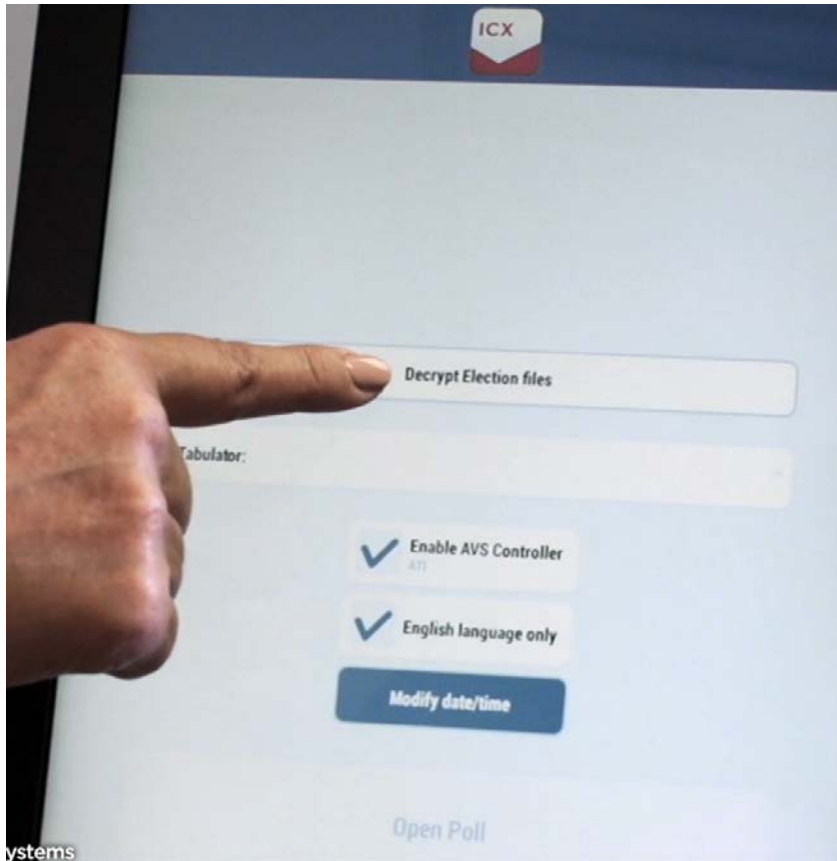

# INSERT POLLWORKER CARD

- The ICX should take about 30 seconds to turn on
- Insert POLL WORKER card when asked to insert 'authorization' card
- Enter password for current election

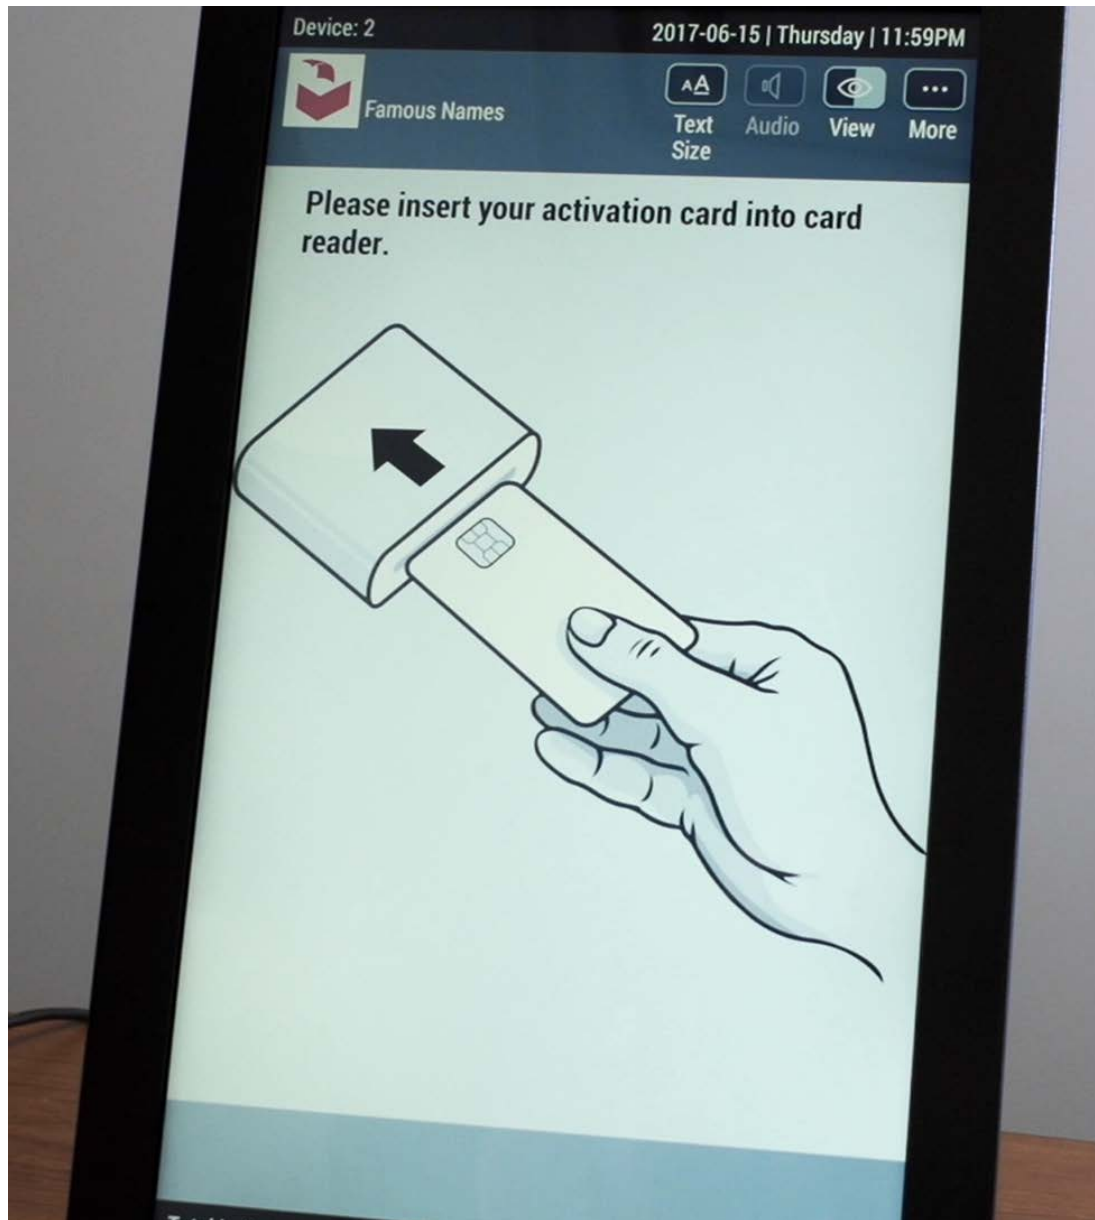

# POLL WORKER MENU – OPEN POLL

- Select “Decrypt Election File” this unlocks the files that were previously loaded onto the ICX
- The select the current Precinct where the ICX is located
- Ensure that both boxes have checks in them
- Finally, select “OPEN POLL”

# READY FOR VOTER – POLLS ARE NOW OPEN

- The poll is now open on the ICX
- This screen will be displayed when the unit is ready to accept the next voter

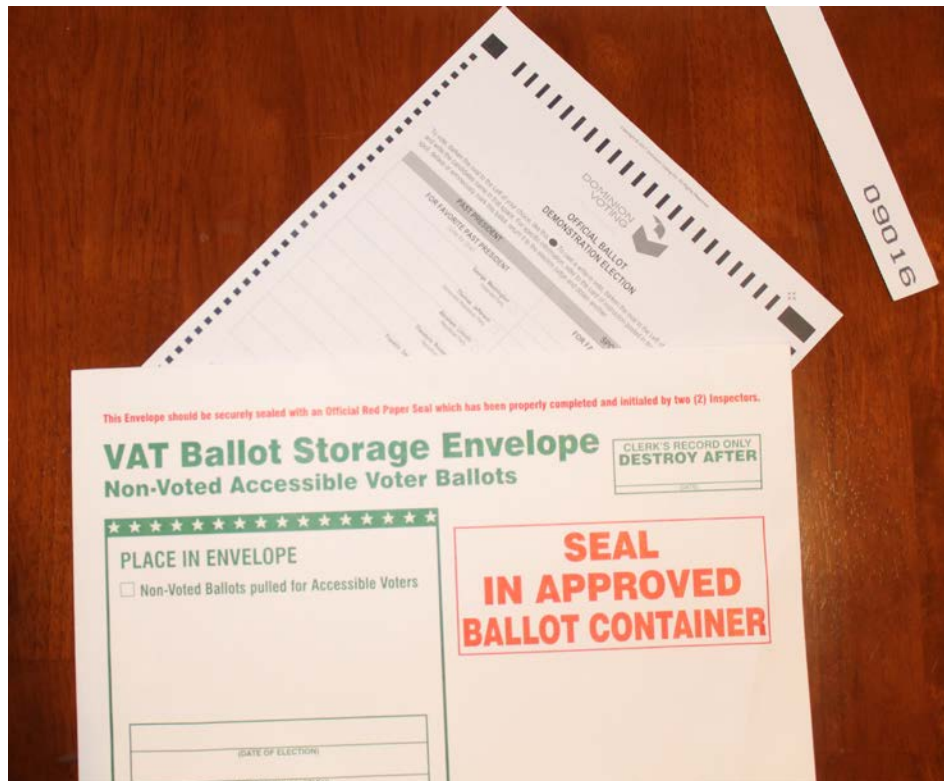

## VOTING ON THE ICX

# ISSUING A BALLOT FOR THE ICX

- Issue the next, regular ballot
- Remove the stub and place UNVOTED, regular ballot into the “VAT STORAGE ENVELOPE”
- Give this ballot stub to the voter with their application to vote

- Give the voter an active VOTER ACCESS card to insert into the ICX

# USING BLANK, STUBBED BALLOTS METHOD

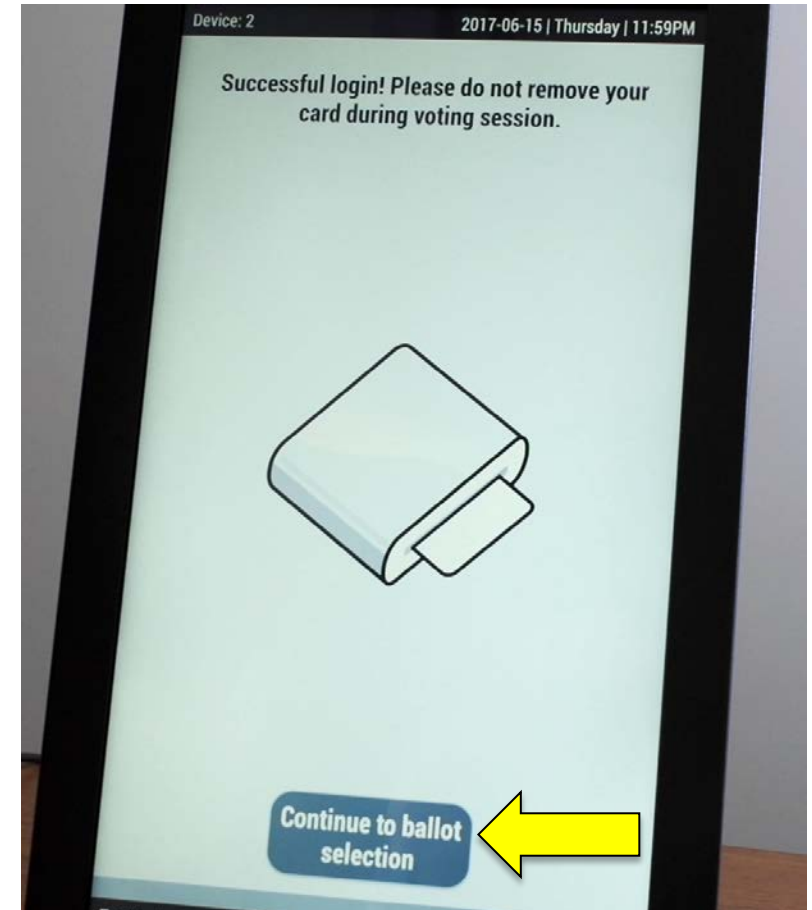

- Open the auxiliary paper tray in the front
- Load the voter's blank, numbered and stubbed ballot into the front auxiliary tray **FEET FIRST.**
- The numbered stub should remain attached and enter the printer last

## INSERT THE VOTER ACCESS CARD

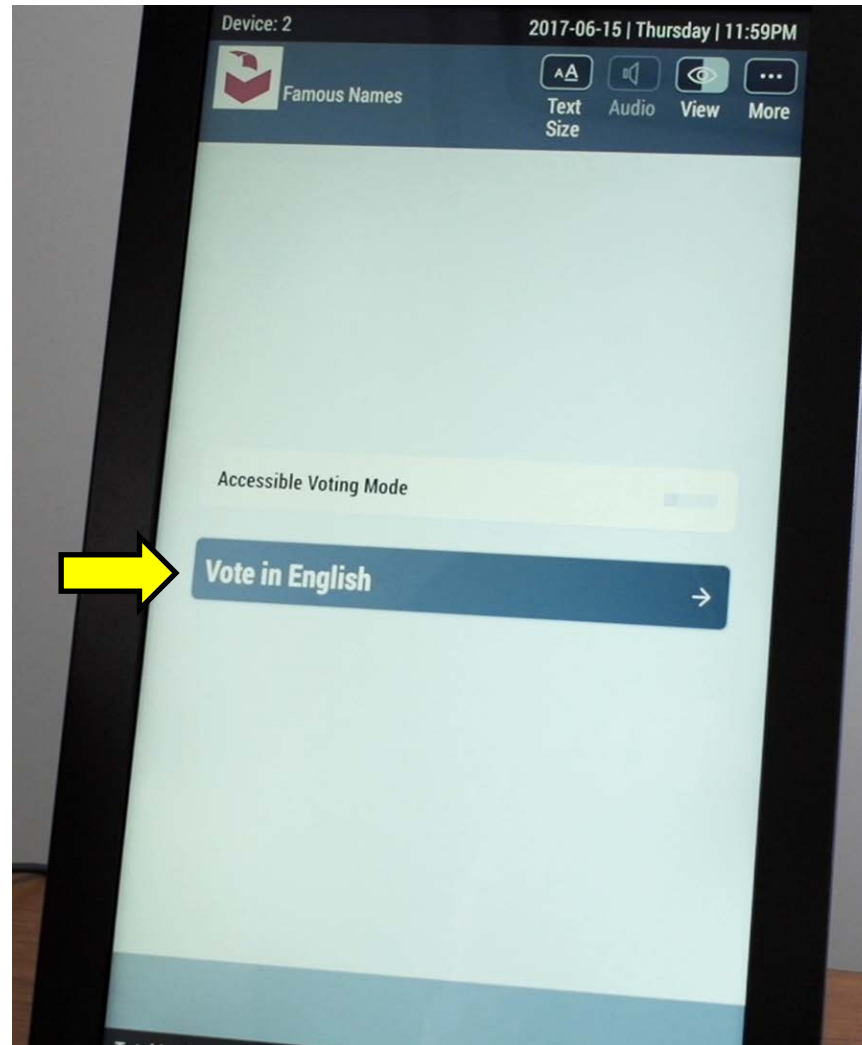

- The Voter will insert an active “Voter Access” card into the smart card slot

- Voter will then select continue to ballot selection.
- Voter card remains in ICX through the duration of the voting selection process

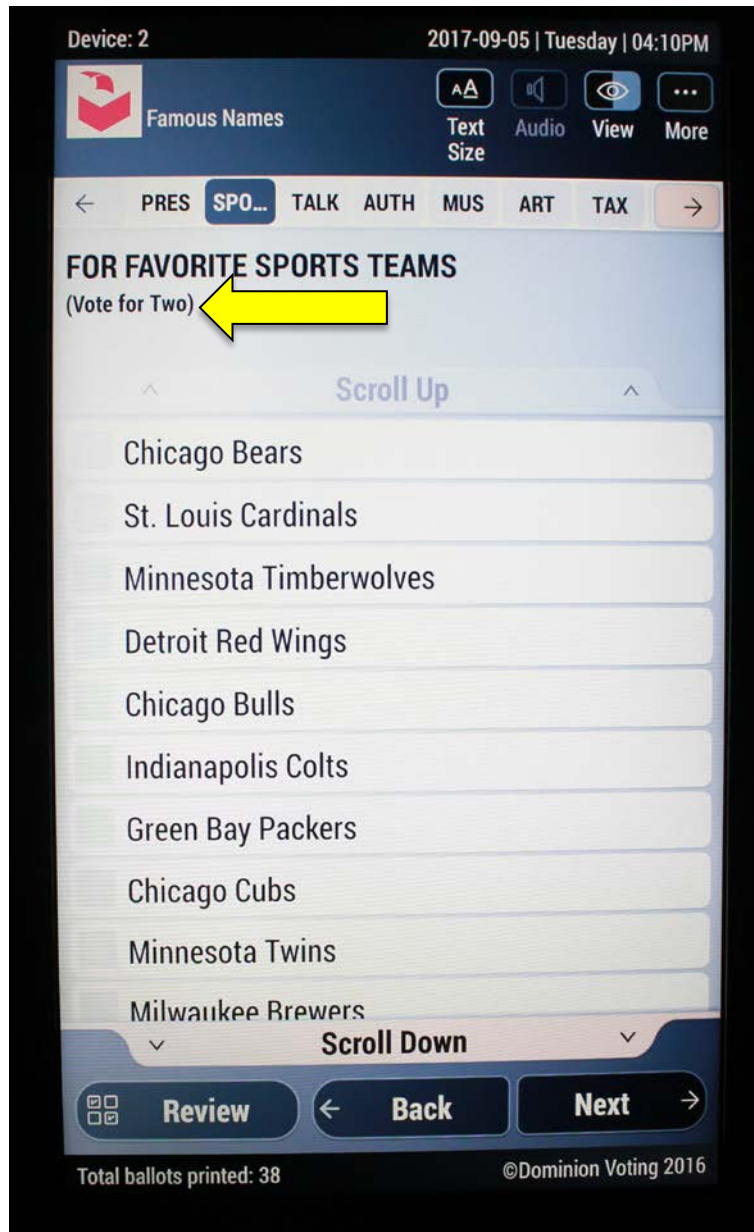

# SELECT APPROPRIATE LANGUAGE

- Voter will select the desired language and process onto the voting process.

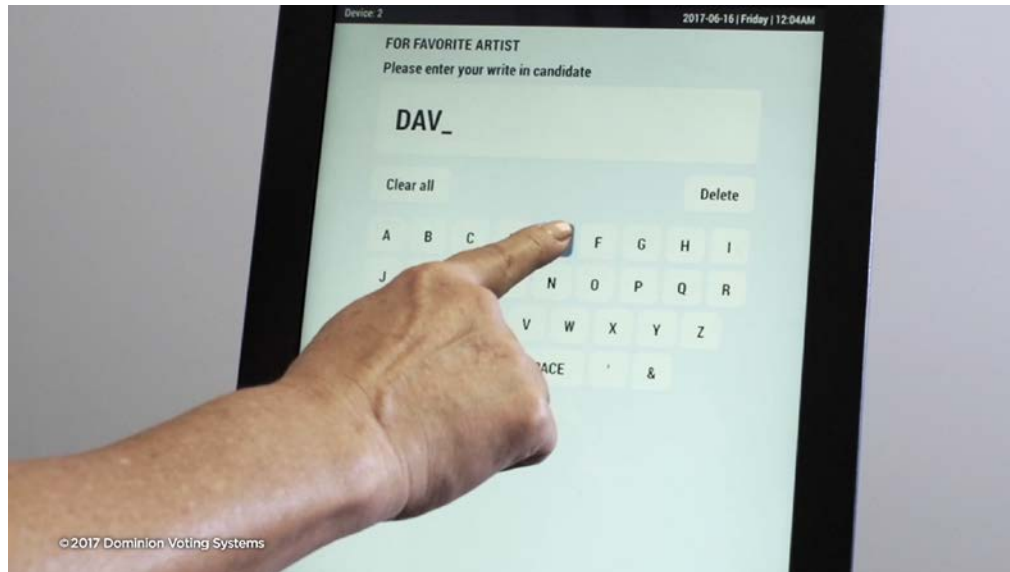

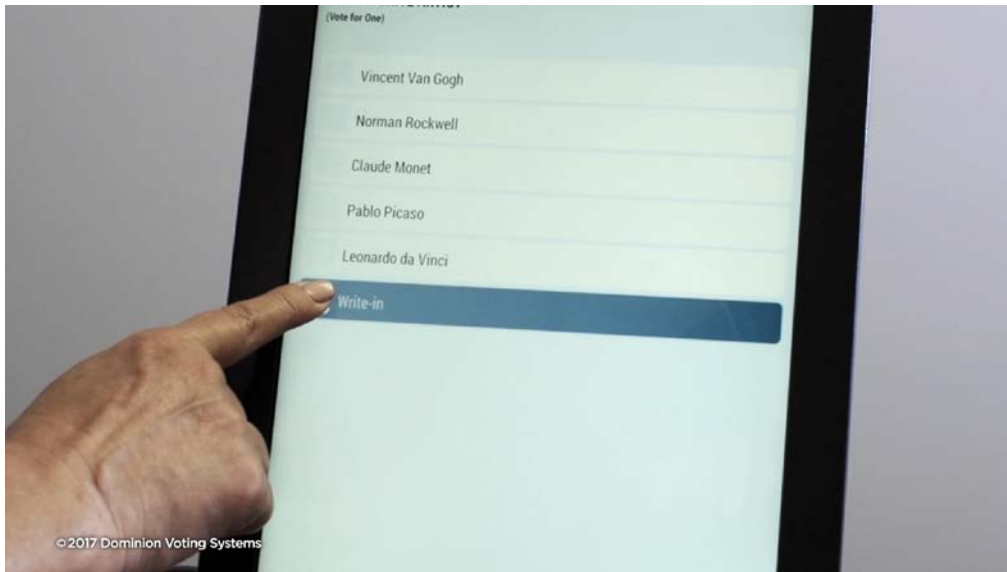

# VOTER PROCEEDS TO MAKE THEIR SELECTIONS

- The voter will make their choices by pressing the preferred candidate
- Once the “Vote For” number is satisfied, all other candidate options become unavailable
- If a change is needed, the voter will deselect their choice, then select their new preference
- The ballot can be navigated by selecting the “Next”, “Back” or the “Review” option at anytime
- Have the voter make their selections by following prompts on the ICX. Once the voter is finished voting in a particular race, they should hit next. Continue voting and selecting next till the end of the ballot is reached.

# WRITE-INS

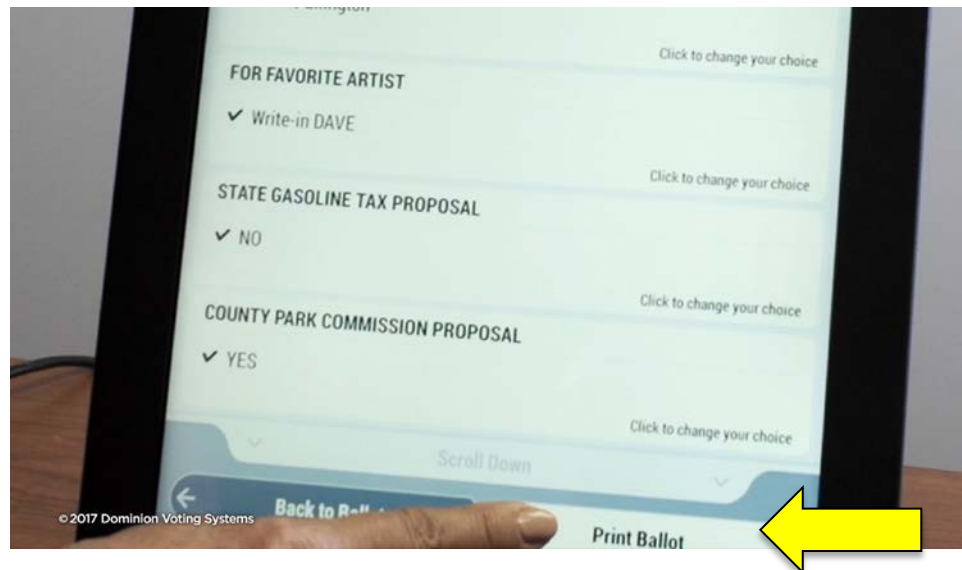

- If there is a write-in, the voter will have the option to type in a write-in candidate with a keyboard on the screen after the “Write-in” is selected

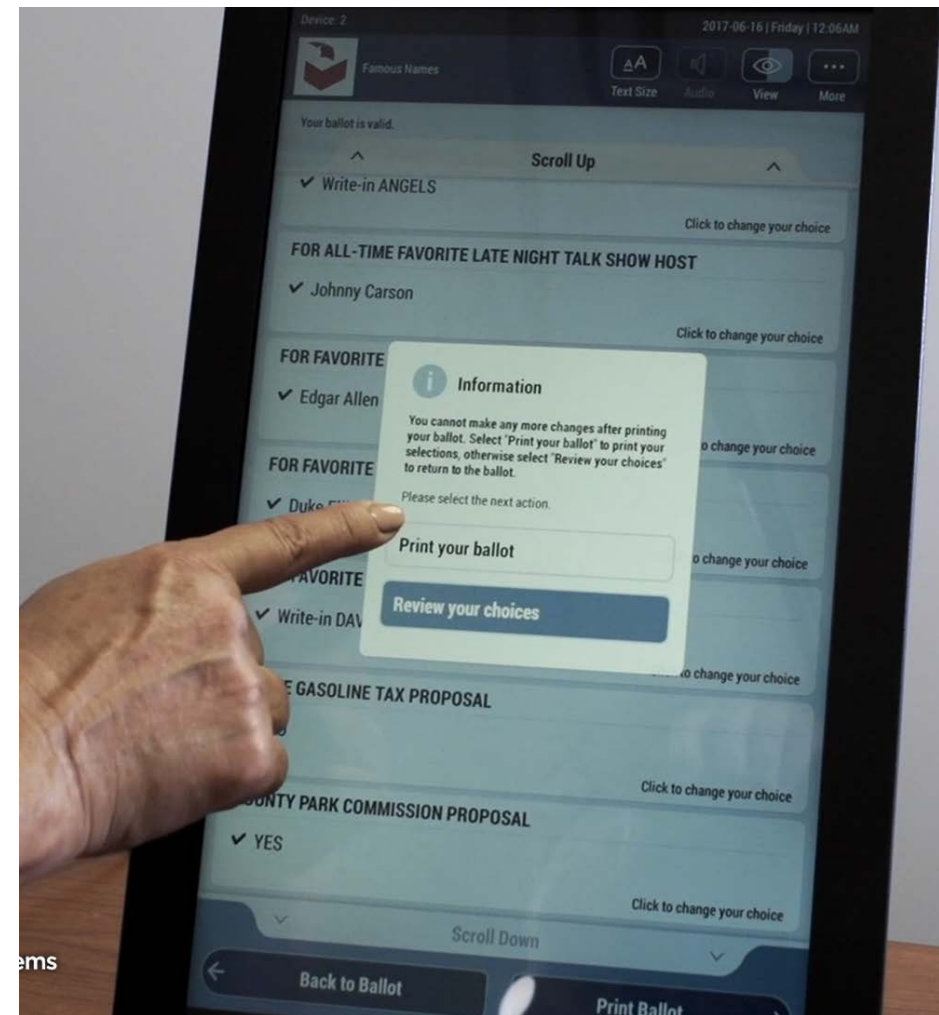

# PRINTING BALLOT

- After reviewing the ballot, the voter may select races to re-visit and change or the “Print Ballot” option to commit their choices to paper
- Once the “Print Ballot” option has been selected, another chance to review the ballot will be given before the voter selects “Print your ballot”

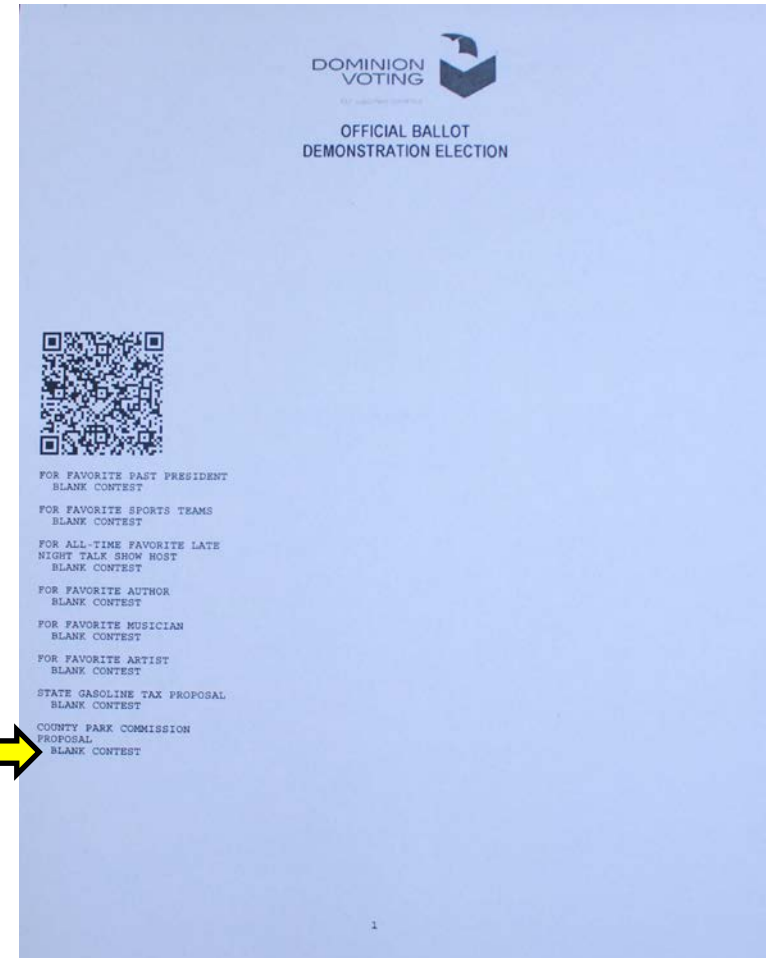

# PRINTED BALLOT

© 2017 Dominion Voting Systems

- The ballot will print and remain face-down for the voter to retrieve
- The voter has one more chance to review their choices before casting their ballot
- The ballot will then be placed in a secrecy sleeve and inserted into the ImageCast Precinct (ICP) tabulator

# DEPOSIT VOTED BALLOT

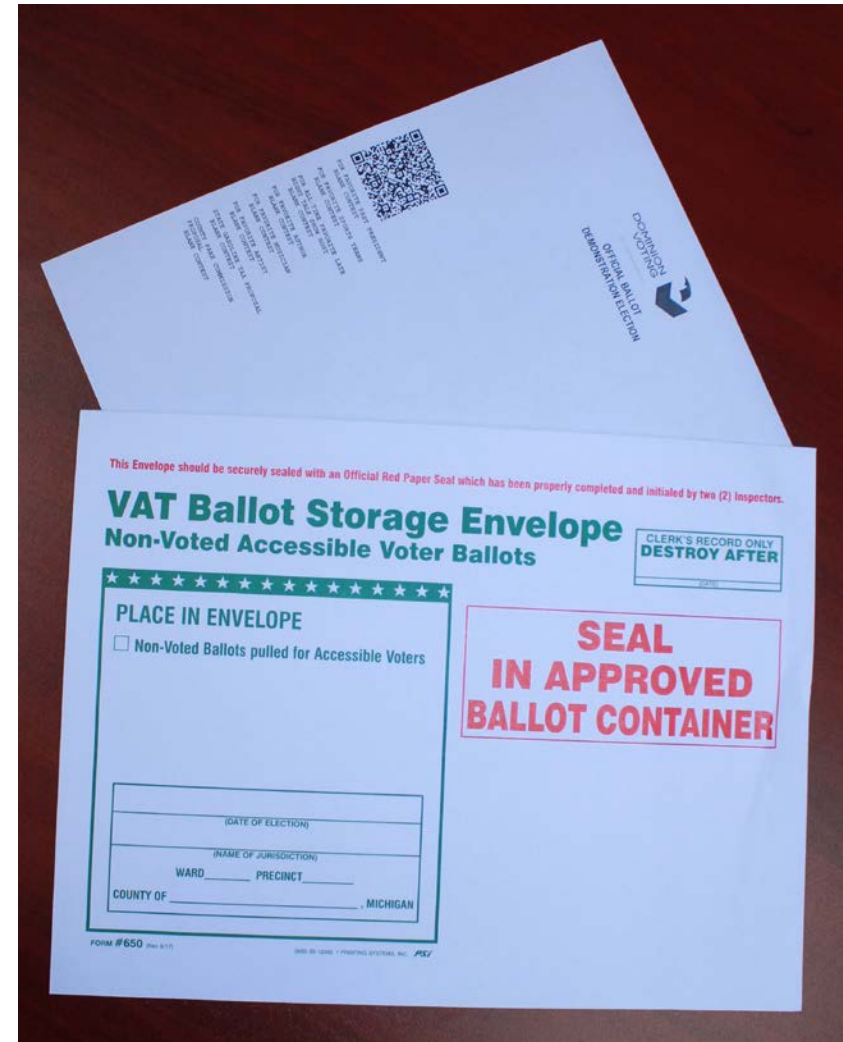

- The printed ICX ballot should be reviewed, then cast into the tabulator
- The voter will give the poll worker the ballot stub, application to vote and the expired Voter Access Card

# SECURE UNPROCESSED BALLOTS

- Any ICX ballot that are not processed through the ICP tabulator must be placed in a VAT ballot storage envelope
- A “Blank” ballot must be printed at the beginning of each Election Day to prove the functions of the ICX
- This “Blank” ballot is placed into the Clerk’s ballot storage envelope

# ACCESSIBLE VOTING ON THE ICX

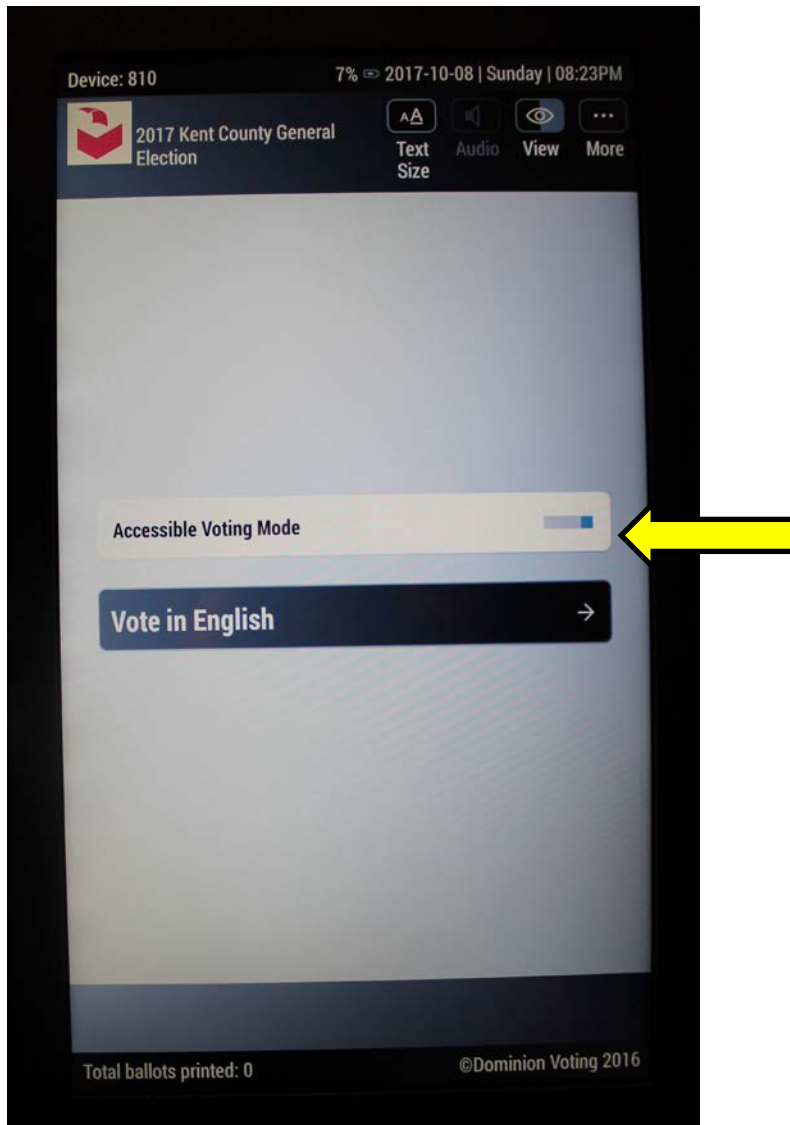

# ATTACH THE ATI ACCESSIBLE DEVICE

- Be sure to connect the ATI (Audible Tactile Interface) cable from the ICX device into the ATI
- The headphones will also need to be inserted into the back of the ATI device.

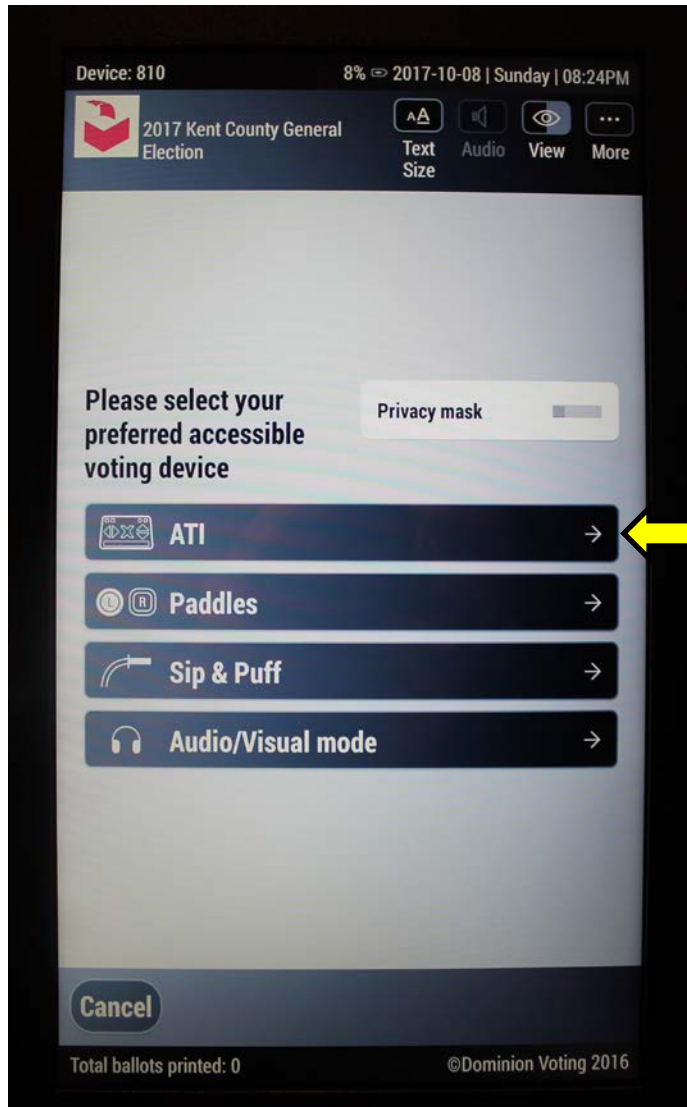

# CHOOSE “ACCESSIBLE VOTING MODE”

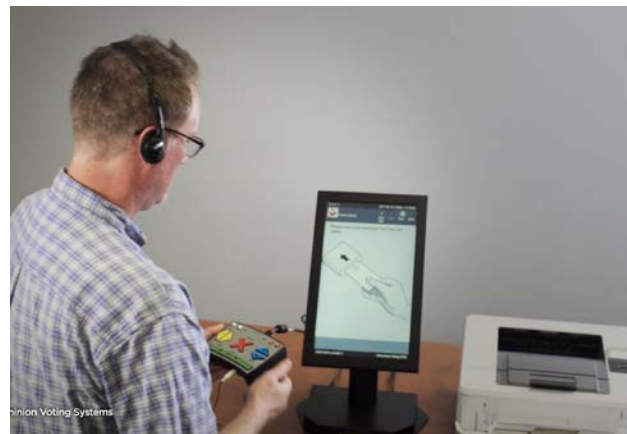

- After the ATI is connected, insert a new voter card into the ICX.
- There is an option for Accessible Voting Mode.
- Select the accessible voting mode option. (There should be a little blue box that turns on when doing so)
- Image to the left indicates the accessible voting mode is on.

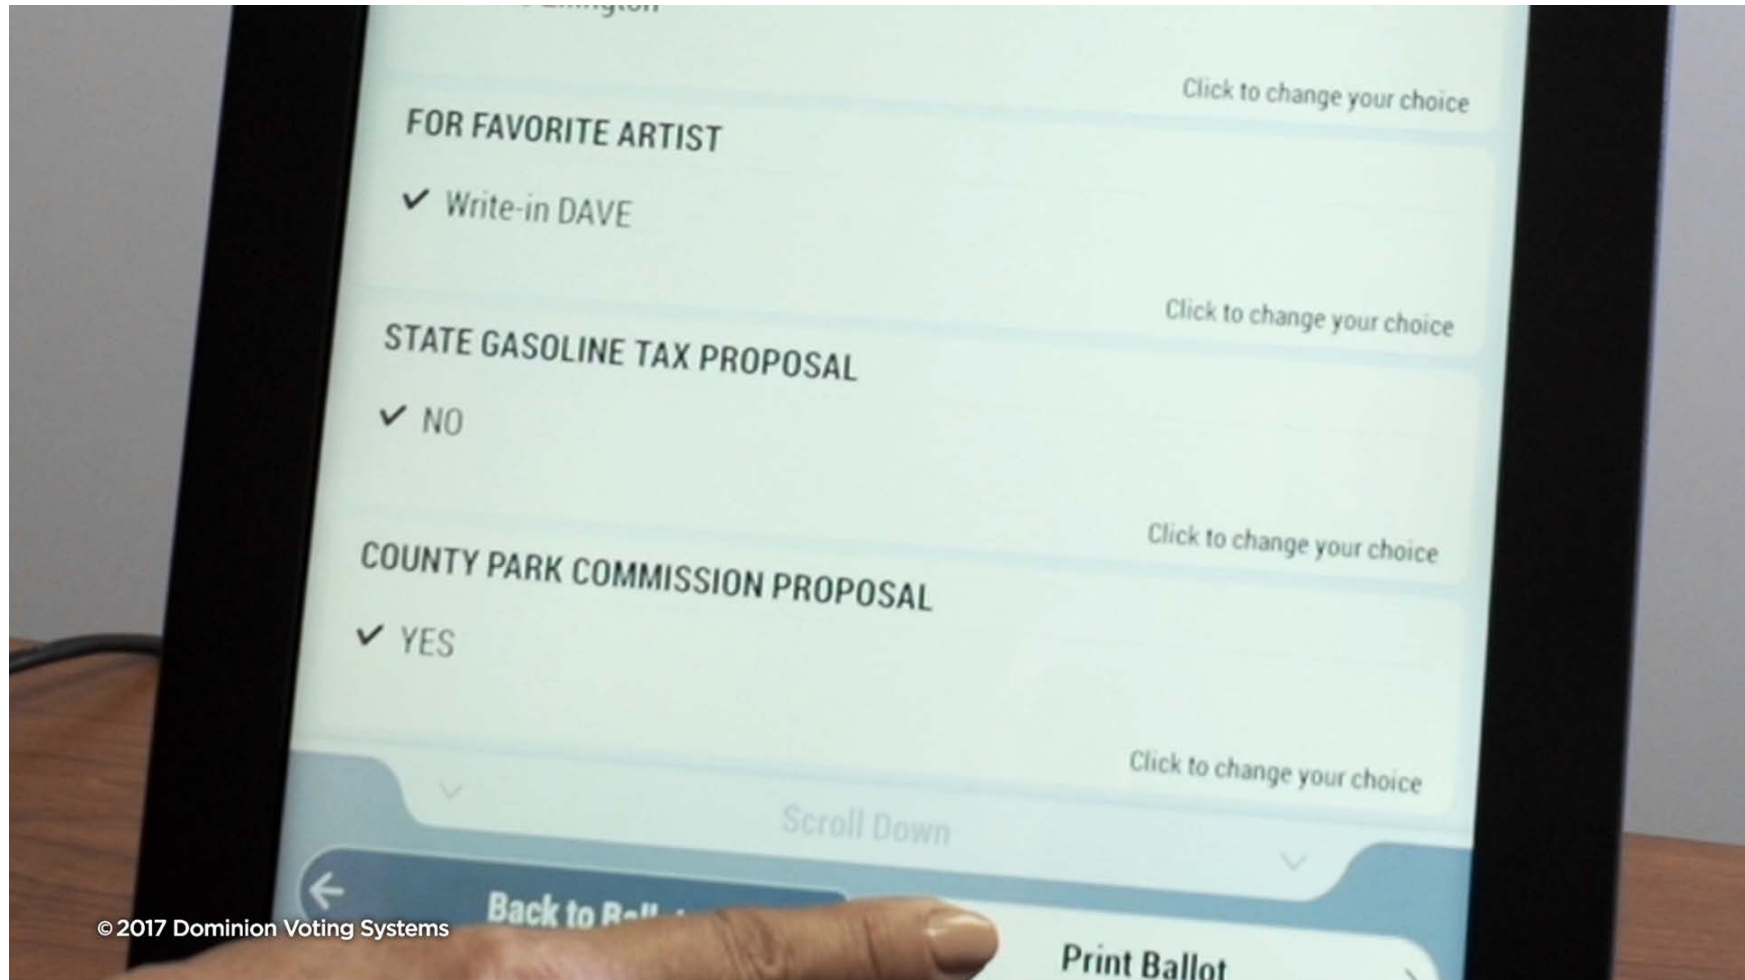

# SELECT ACCESSIBLE DEVICE

- Another screen will appear listing available accessible device options.
- Select the option that says “ATI”
- From here the voter is ready to begin using the ATI device.
- The voter will follow the audio prompts to navigate and complete their ballot

## PRESS PRINT TO COMPLETE CHOICES

- Once the accessible voter has completed and reviewed their ballot, they will select “Print Ballot”

# PRINTING THE VOTER'S CHOICES

- The ballot will print and remain face-down for the voter to retrieve
- The ballot will then be placed in a secrecy sleeve and inserted into the ImageCast Precinct (ICP) tabulator

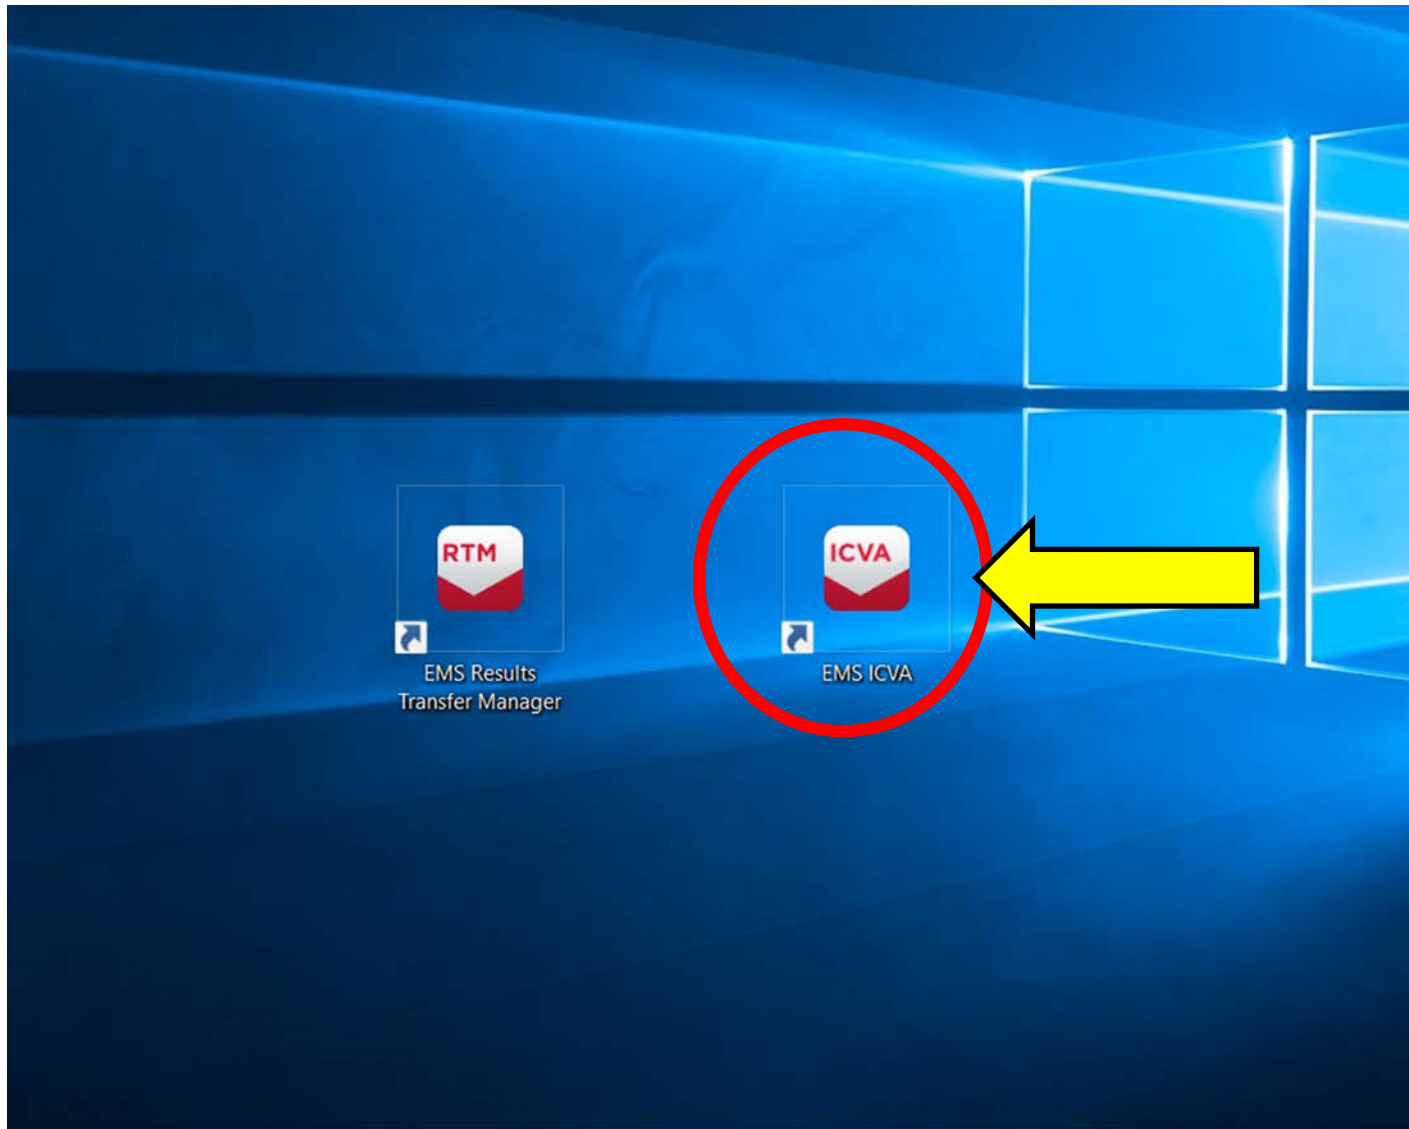

# VOTER CARD REACTIVATION

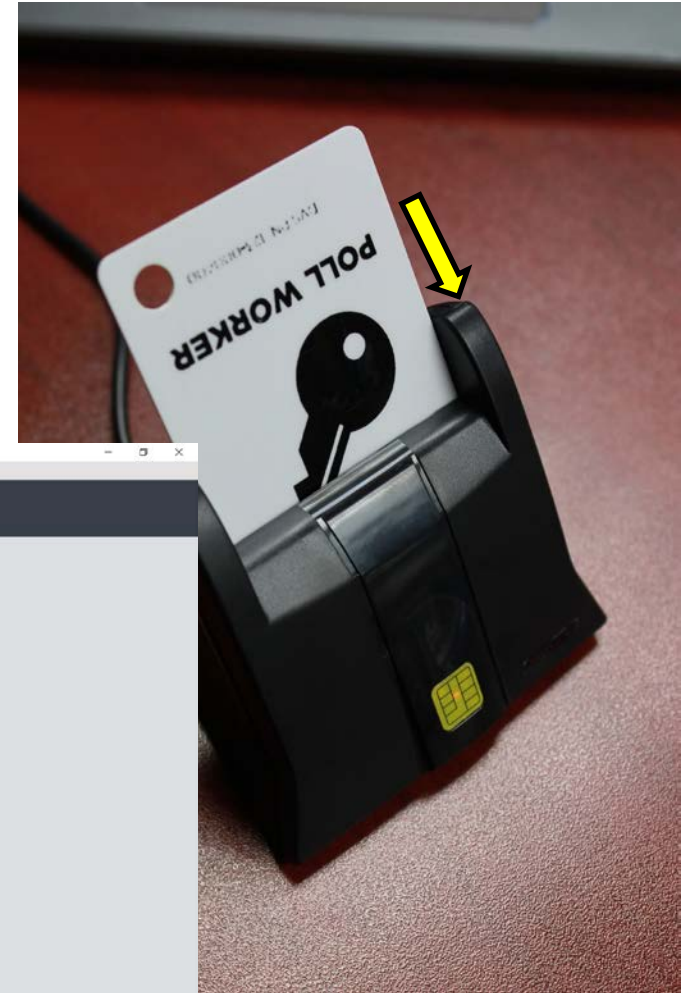

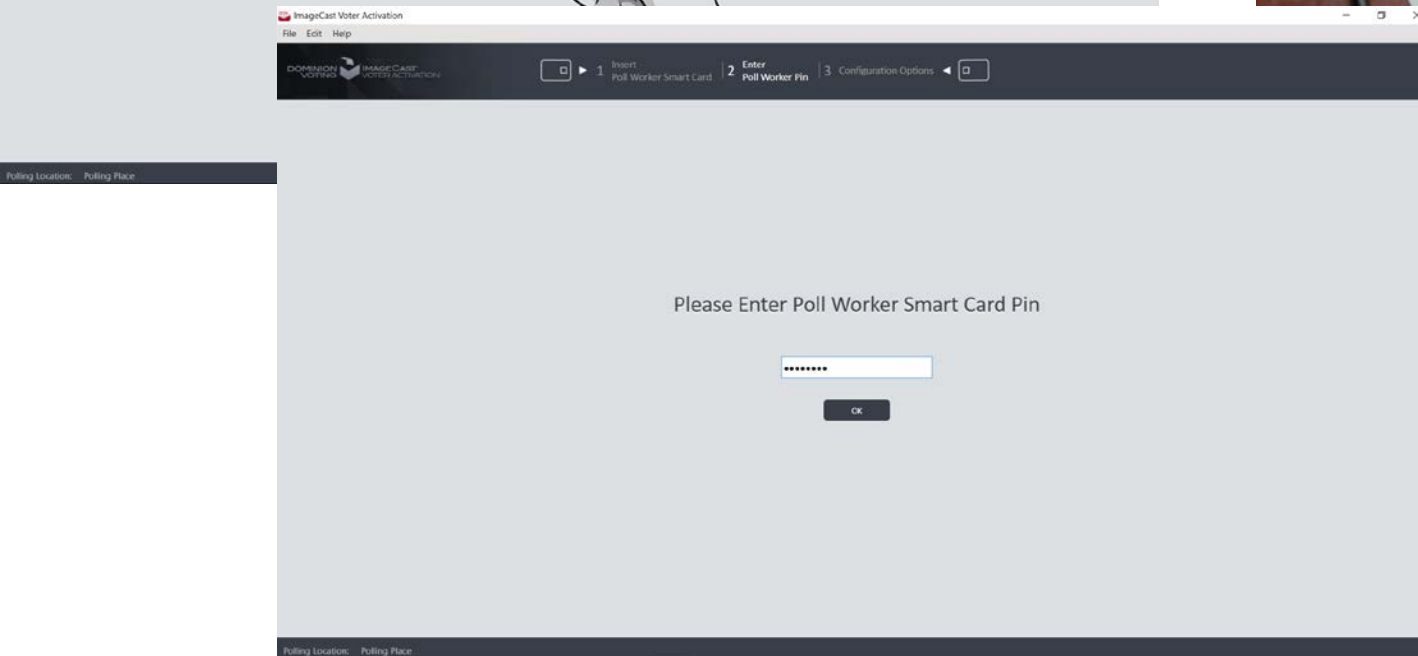

## OPEN THE ICVA PROGRAM

- Find the “ICVA”, red and white icon on the desktop
- Double-click on the ICVA icon to open ICVA

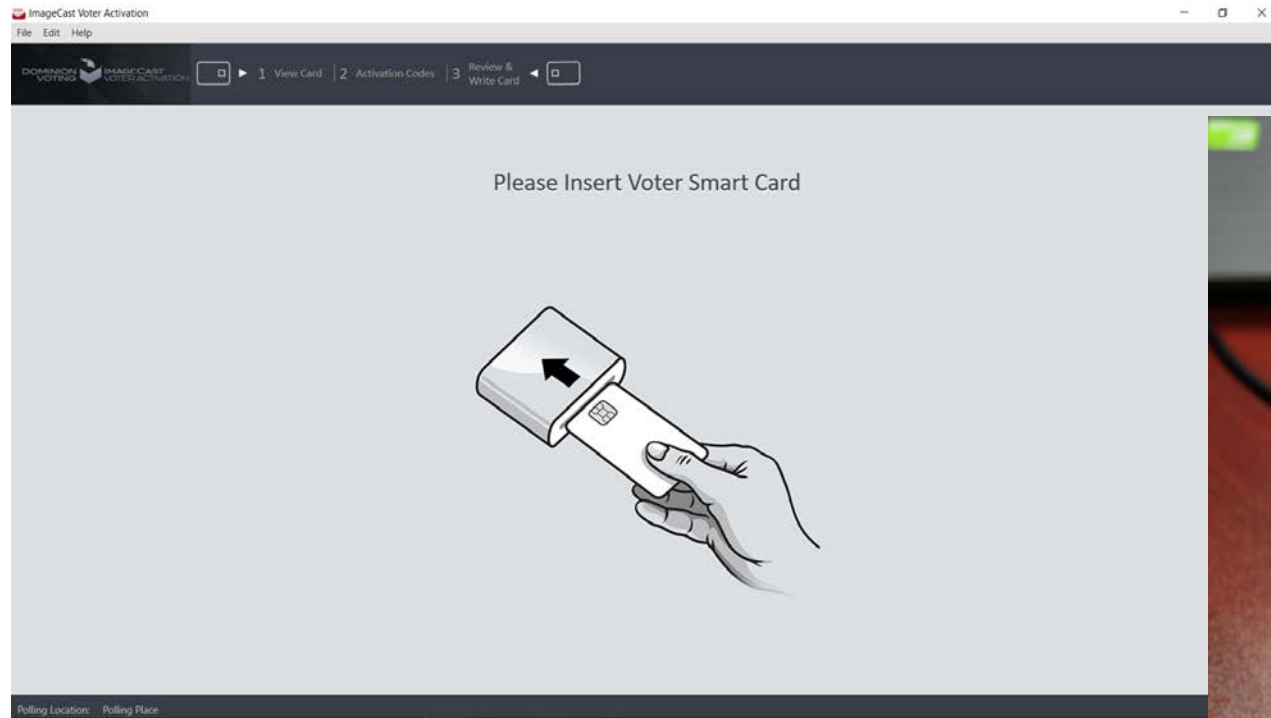

# OPEN WITH POLL WORKER CARD

- Insert Poll Worker card
- Enter password for current election

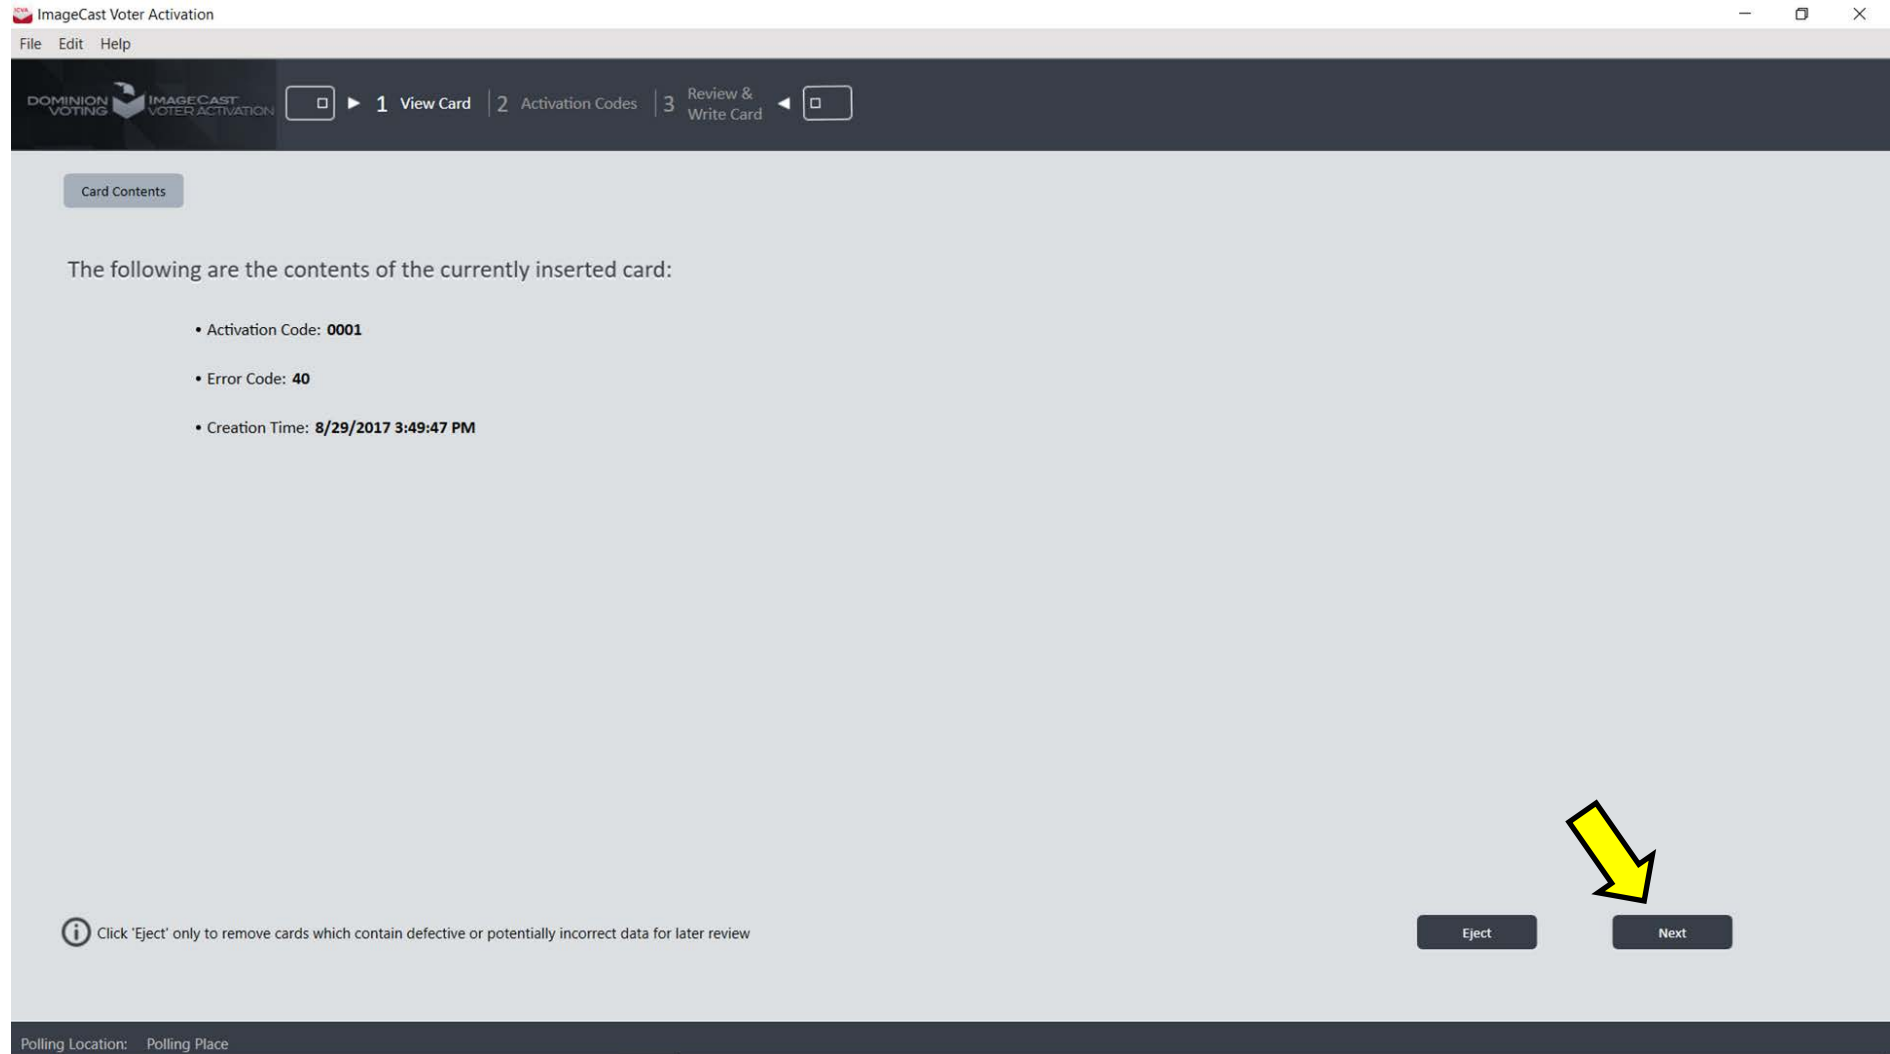

# REACTIVATE VOTER CARD

- Insert Voter Access Card

# CARD CONTENTS SCREEN

- At the “Card Contents” screen, select “NEXT”

# CHOOSE BALLOT STYLE
