[Hacked: Tens of millions of US voter records are being sold on the Dark Web, what this means to you](#)

By Francis Navarro, Komando.com

A successful data breach is like hitting the jackpot for cybercriminals. These breaches typically allow shady outfits to acquire the personal and sensitive information of millions and sell them online for a quick profit.

This is why it's important to be aware of the latest known breaches that are occurring around you.

Most known data breaches happen when a hacker manages to infiltrate an online database or a website with user records. But what if legitimately acquired information is being peddled and shopped around illegally online?

This is exactly what's happening to millions of voter registration records across multiple states. Read on and see why this new cybercriminal scheme can be a threat, not just to you, but to the whole country, as well.

Voter data now available on the Dark Web

Now, this is quite troubling. The personal information and voting history of over 35 million U.S. voters were spotted to be on sale on a popular Dark Web hacking forum.

Cybersecurity researchers from Anomali Labs and Intel471 discovered the advertisements and they noted that this is the first of its kind.

"To our knowledge this represents the first reference on the criminal underground of actors selling or distributing lists of 2018 voter registration data," said Hugh Njemanze, Anomali Labs' CEO.

Data advertised in the cache reportedly includes the following:

- Full name
- Phone numbers
- Physical addresses
- Voting history (Note: This pertains to whether you voted on a certain election. This doesn't indicate who you voted for.)
- Other unspecified voting data

Researchers from both Anomali Labs and Intel761 said that they have reviewed a portion of the database and they have "determined the data to be valid with a high degree of confidence."

Based on a screenshot from Anomali Labs, here are the states listed in the forum post and their corresponding prices:

- Montana - \$1000
- Louisiana - \$5000 (3 Million Voters)

- Iowa - \$1100
- Utah - 1100
- Oregon - \$500
- South Carolina - \$2500
- Wisconsin - \$12500 (6 Million Voters)
- Kansas - \$200
- Georgia - \$250
- New Mexico - \$4000
- Minnesota - \$150
- Wyoming - \$500
- Kentucky - \$2000
- Idaho - \$1000
- Tennessee - \$2500
- South Dakota - \$2500
- Mississippi - \$1100
- West Virginia - \$500
- Texas - \$1300\$ (14 Million Voters)

<https://accelerator-origin.kkomando.com/wp-content/uploads/2018/10/Anomali-Voter-Data.png>

Image Credit: Anomali Labs

Based on this information, it appears that only three states -- Louisiana, Wisconsin, and Texas -- have listed voter headcounts, amounting to 23 million. However, Anomali Labs estimates that the entire breach may contain over 35 million records. The grand total for all 19 states? \$42,200.

How does the seller acquire the data?

According to the Dark Web seller, they receive weekly updates of voter registration data from these states from... get this, contacts within the state governments. This suggests that there are government sources in these states that are actively giving away the information.

Certain states even require the seller to travel directly to locations in-state and receive the updates in person.

Keep in mind that voter registration data can actually be obtained legally at different costs at each state. (More on this later.)

This means that the data was not necessarily acquired via cyberattacks or online database infiltrations, but rather, it looks like the seller is trying to redistribute legitimately acquired voter data for a profit.

Is this data public or not?

As I mentioned earlier, these voter registration lists can be acquired legally in certain states by authorized organizations like journalists, researchers and political campaigns. Most states even consider basic voter registration data like full names, addresses, emails, and party affiliations as public records.

However, voter lists cannot be used for commercial purposes nor can they be republished and posted online.

So the question is this. Is the seller legitimately obtaining the data and reselling it online (highly unlikely) or is the data being intercepted and stolen from authorized groups like market researchers and political campaigns? Most probably.

If anything, the emergence of these voter registration lists from the affected 19 states highlights how unauthorized parties can obtain this data with relative ease.

Since they don't follow the state rules and restrictions imposed on authorized data brokers, they are willing to redistribute the information for profit with total disregard for the law. (They don't call them cybercriminals for nothing, right?)

How can this information be harmful to you?

Although most of the voter information included in this breach can be considered public and can be acquired for free in some states, this is the first time that it has been collected in one place and sold online.

When these voter lists are combined with other sensitive information from other data breaches (Social Security numbers from the Equifax breach, for example), cybercriminals can create full individual profiles that can be used for identity theft and election fraud.

In fact, with this data, malicious actors can disrupt the upcoming U.S. elections via physical address changes, deletion of voter registrations or absentee ballot requests for legitimate voters.

Is there a way to know if you're part of the lists?

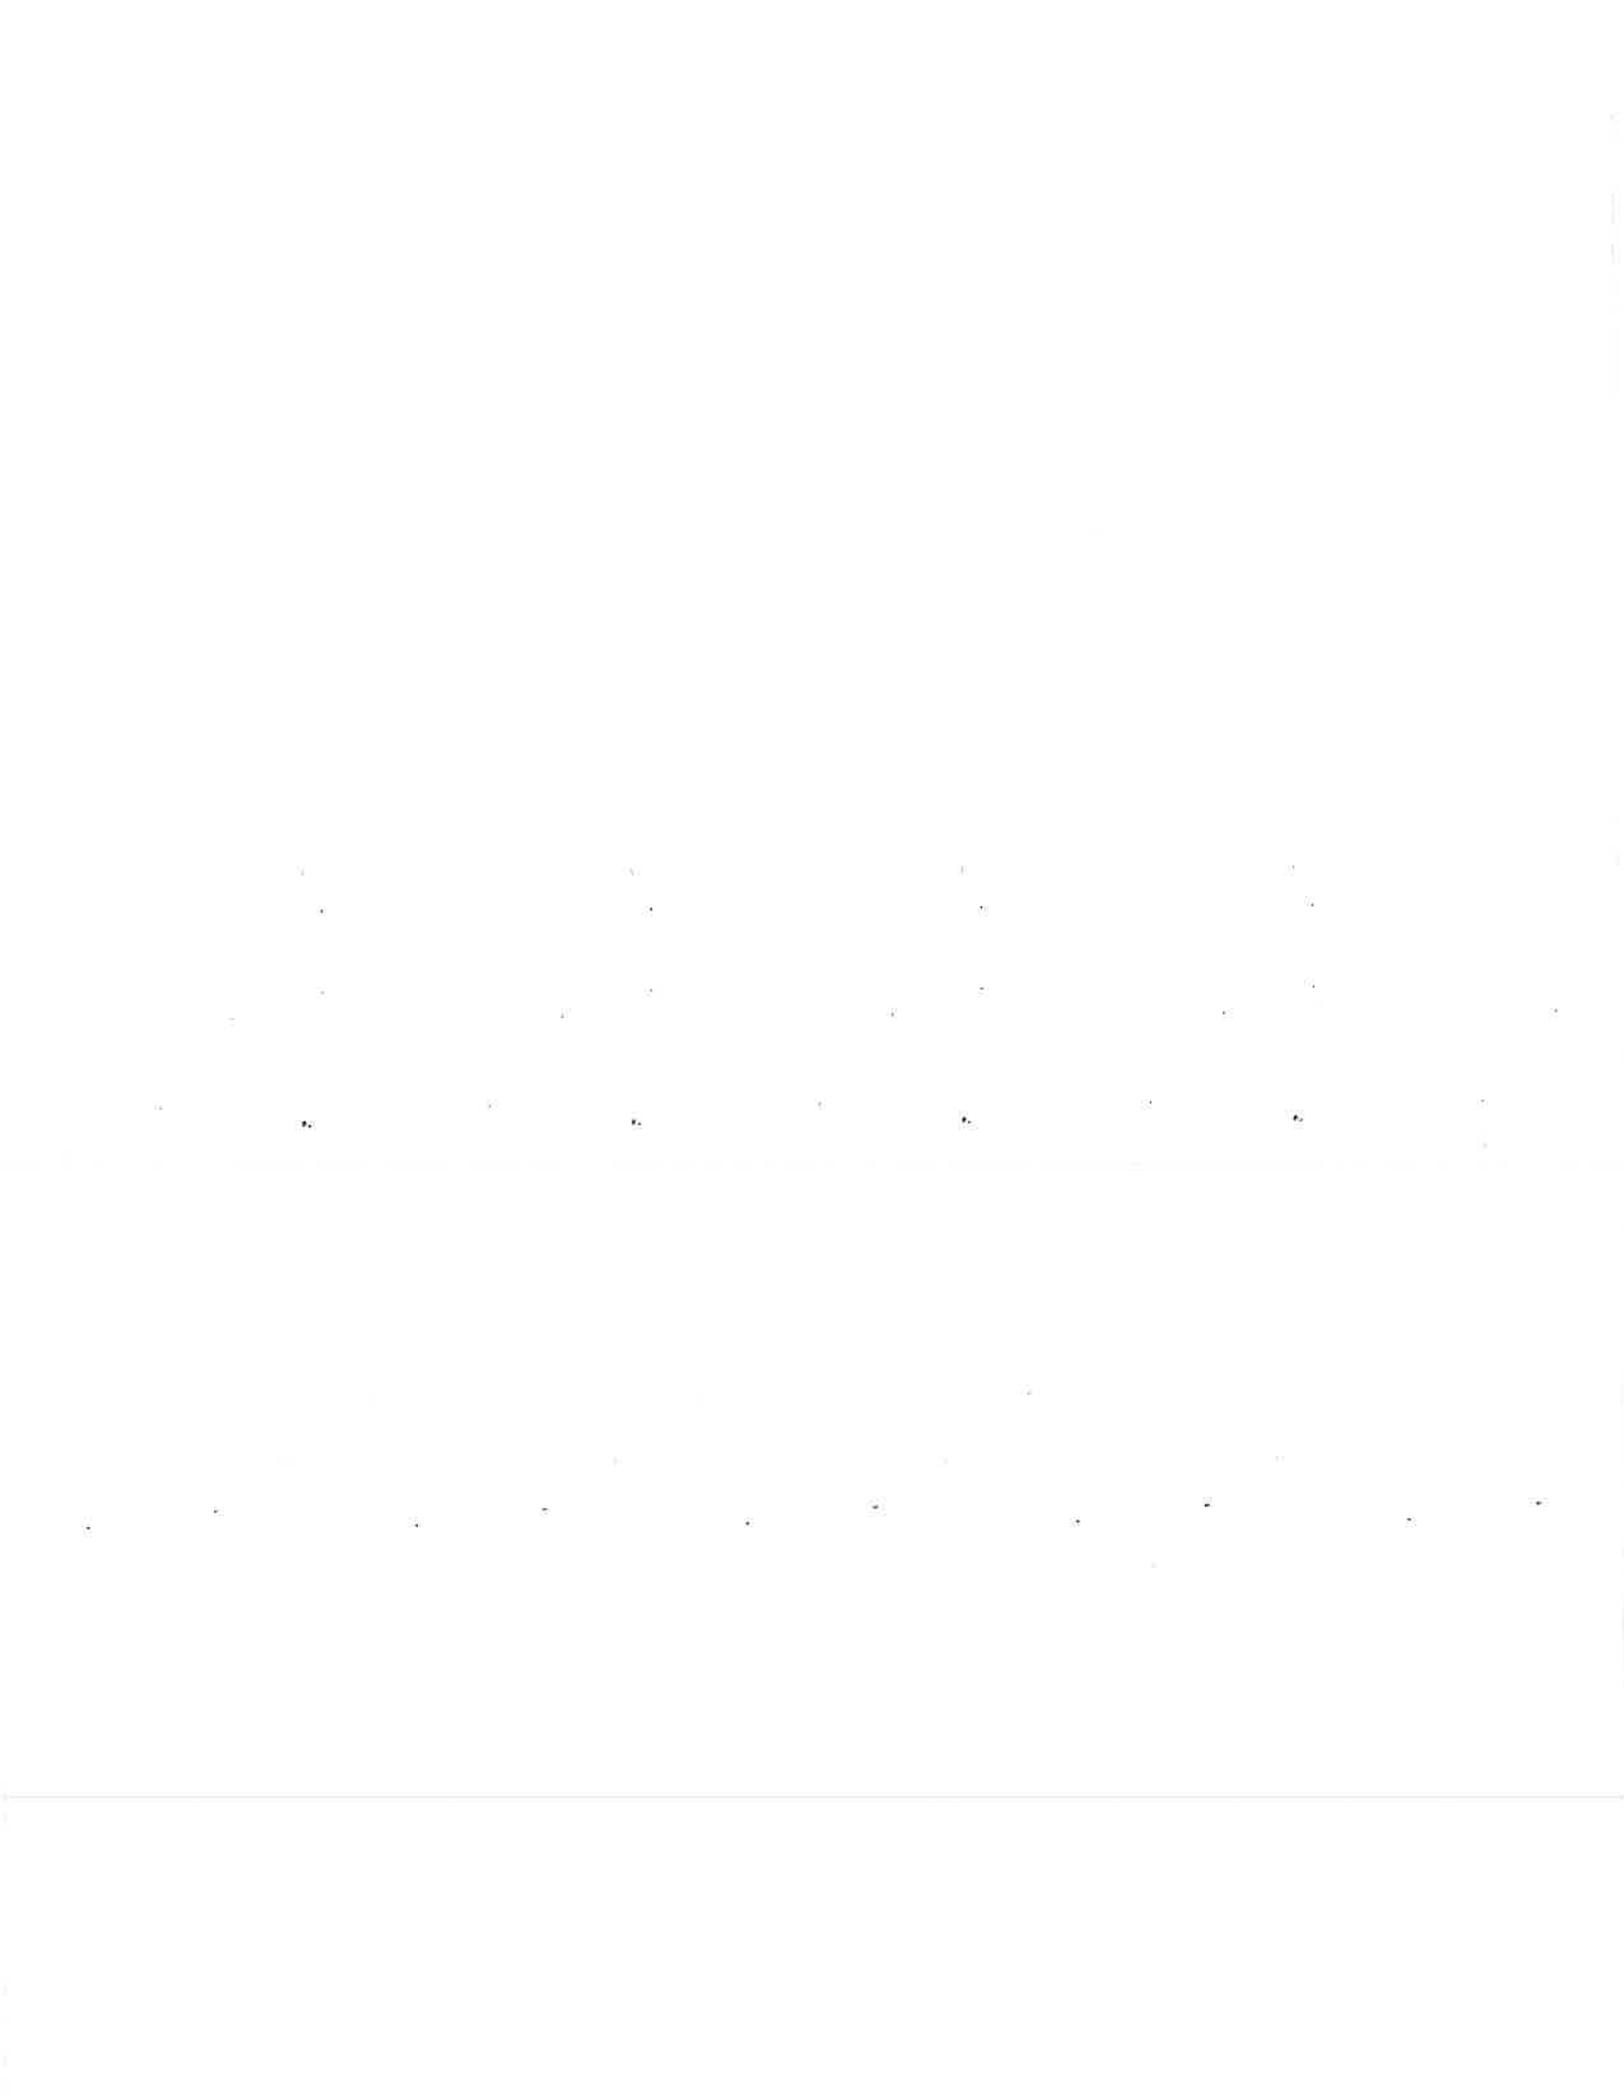

So is your name included in the breach? Unfortunately, since the data is still up for sale, the full reach nor the actual contents of the information is not fully known yet.

But a member of the Dark Web message board is currently organizing a crowdfunding campaign to raise the money to purchase each state's voter registration list so the data can leak out sooner or later.

- However, if you are a resident and a registered voter of any of the 19 states included in the list, it's safe to assume that your information is part of the breach.

Like I said, voter information is publicly accessible anyway and the real danger is when this data is combined with the information from other breaches. [Click here for one important step in protecting your Social Security number and identity.](#)

Sherrie Swenson. Thank you for you and your staff's hard work.

We have a few questions about voting this fall and would like an updated FAQ section at Vote Utah website.

- 1) Could you let us know what is being done to ensure our election is secure and our ballots will arrive and be counted?
- 2) Are we able to drop ballots off at locations as we have in past. Or will all ballots be required to go through USPS?
- 3) Could you update the Vote Utah website to include the November election information? June is past and the information there is not as relevant.
- 4) When could we see updated information online?
- 5) [REDACTED], changed from independent to democrat earlier this year. Since then, information about vote status has been difficult to find online. I received information that I am registered, but what has changed with this status that would make it difficult to look up information. I am concerned that I won't receive a ballot timely now and be able to have the same voting options as I have in past. What can I expect?

Thank you,
Registered Voters:

Salt Lake County Clerk Sherrie Swenson
[2001 South State Street, S1-200](#)
[Salt Lake City, UT 84114-4575](#)

Dear Lt. Governor Cox and SLCounty Clerk Sherrie Swenson,

As you know, a candidate vacancy in Senate District 9 occurred on May 18, 2018. This vacancy was due to the withdrawal of the general election candidate representing the Democrat Party, Abigail Wright. It has come to our attention the Salt Lake County Democrat Party is attempting to nominate a replacement to fill this vacancy tonight, August 15, 2018.

The law is clear regarding the details and procedures on how this can occur. Utah State Code 20A-1-501 details the procedure for filling candidate vacancies (some emphasis added):

Section 20A-1-501(1) states:

“...the county central committee of a political party, for all party candidates seeking an office elected at a regular election, may certify the name of another candidate to the appropriate election officer if:”

Section 20A-1-501(b):

“for a registered political party that does not have a candidate on the ballot in a primary, but that will have a candidate on the ballot for a general election, after the close of the period for filing a declaration of candidacy and continuing through the day before the day on which the lieutenant governor makes the certification described in 20A-5-409, the **party’s candidate:**

(i) resigns because of acquiring a physical or mental disability as **certified by a physician;**

The attempt to fill this vacancy does not meet the requirements set forth by statute

and should be deemed invalid by state and county election officers for the following reasons:

1. The candidate resigned by completing a form that was date stamped on May 18, 2018. To our knowledge no reason was given at the time of resignation.
2. In a note addressed to Salt Lake County Clerk Sherrie Swenson dated May 21, 2018, after the official resignation and not date stamped by the clerk's office, [REDACTED] states:

" [REDACTED] "

- The note indicates [REDACTED]. UCA 20A-1-501(b) clearly states that the law only applies to specific instances impacting the "party's candidate".
- [REDACTED] is not a Physician as required in UCA 20A-1-501(b)(ii).
- With no date stamp from the clerk's office we are unable to know when they officially received the note.

3. In a letter addressed to Salt Lake County Clerk Sherrie Swenson dated June 4, 2018, after the official resignation, after the note from [REDACTED] and not date stamped by the clerk's office, [REDACTED] states:

" [REDACTED] "

- The letter is from Abigail [REDACTED]
- The letter states [REDACTED]
- The letter indicates that [REDACTED]
- With no date stamp from the clerk's office we are unable to know when they officially received the note.

4. On August 14, 2018 the Salt Lake County Democrat Party sent an email regarding an upcoming Central Committee meeting set for the next day, today, August 15, 2018. The email states:

"...we received some last minute information that will allow us to replace Abbey Wright on the ballot in Senate District 9. We must do this nomination at the Central Committee meeting tomorrow evening."

This email does not explain the “last minute information” the Party received. We can only assume the information is related to the May 22nd note and the June 4th letter.

- If that is the case and these letters were sent on May 22nd and June 4th then why is the information “last minute”?
- What other information do they have that allows them to conduct this election within the parameters of the clearly defined law?

Even if the process above were allowed within the law, which again it is not, allowing this vacancy to exist for three months without notifying other candidates in the race that there is an attempt to fill it puts all other candidates at a serious disadvantage strategically and financially. Furthermore, it leads to questions about transparency and fairness in elections and could ultimately cause voters to distrust the process entirely.

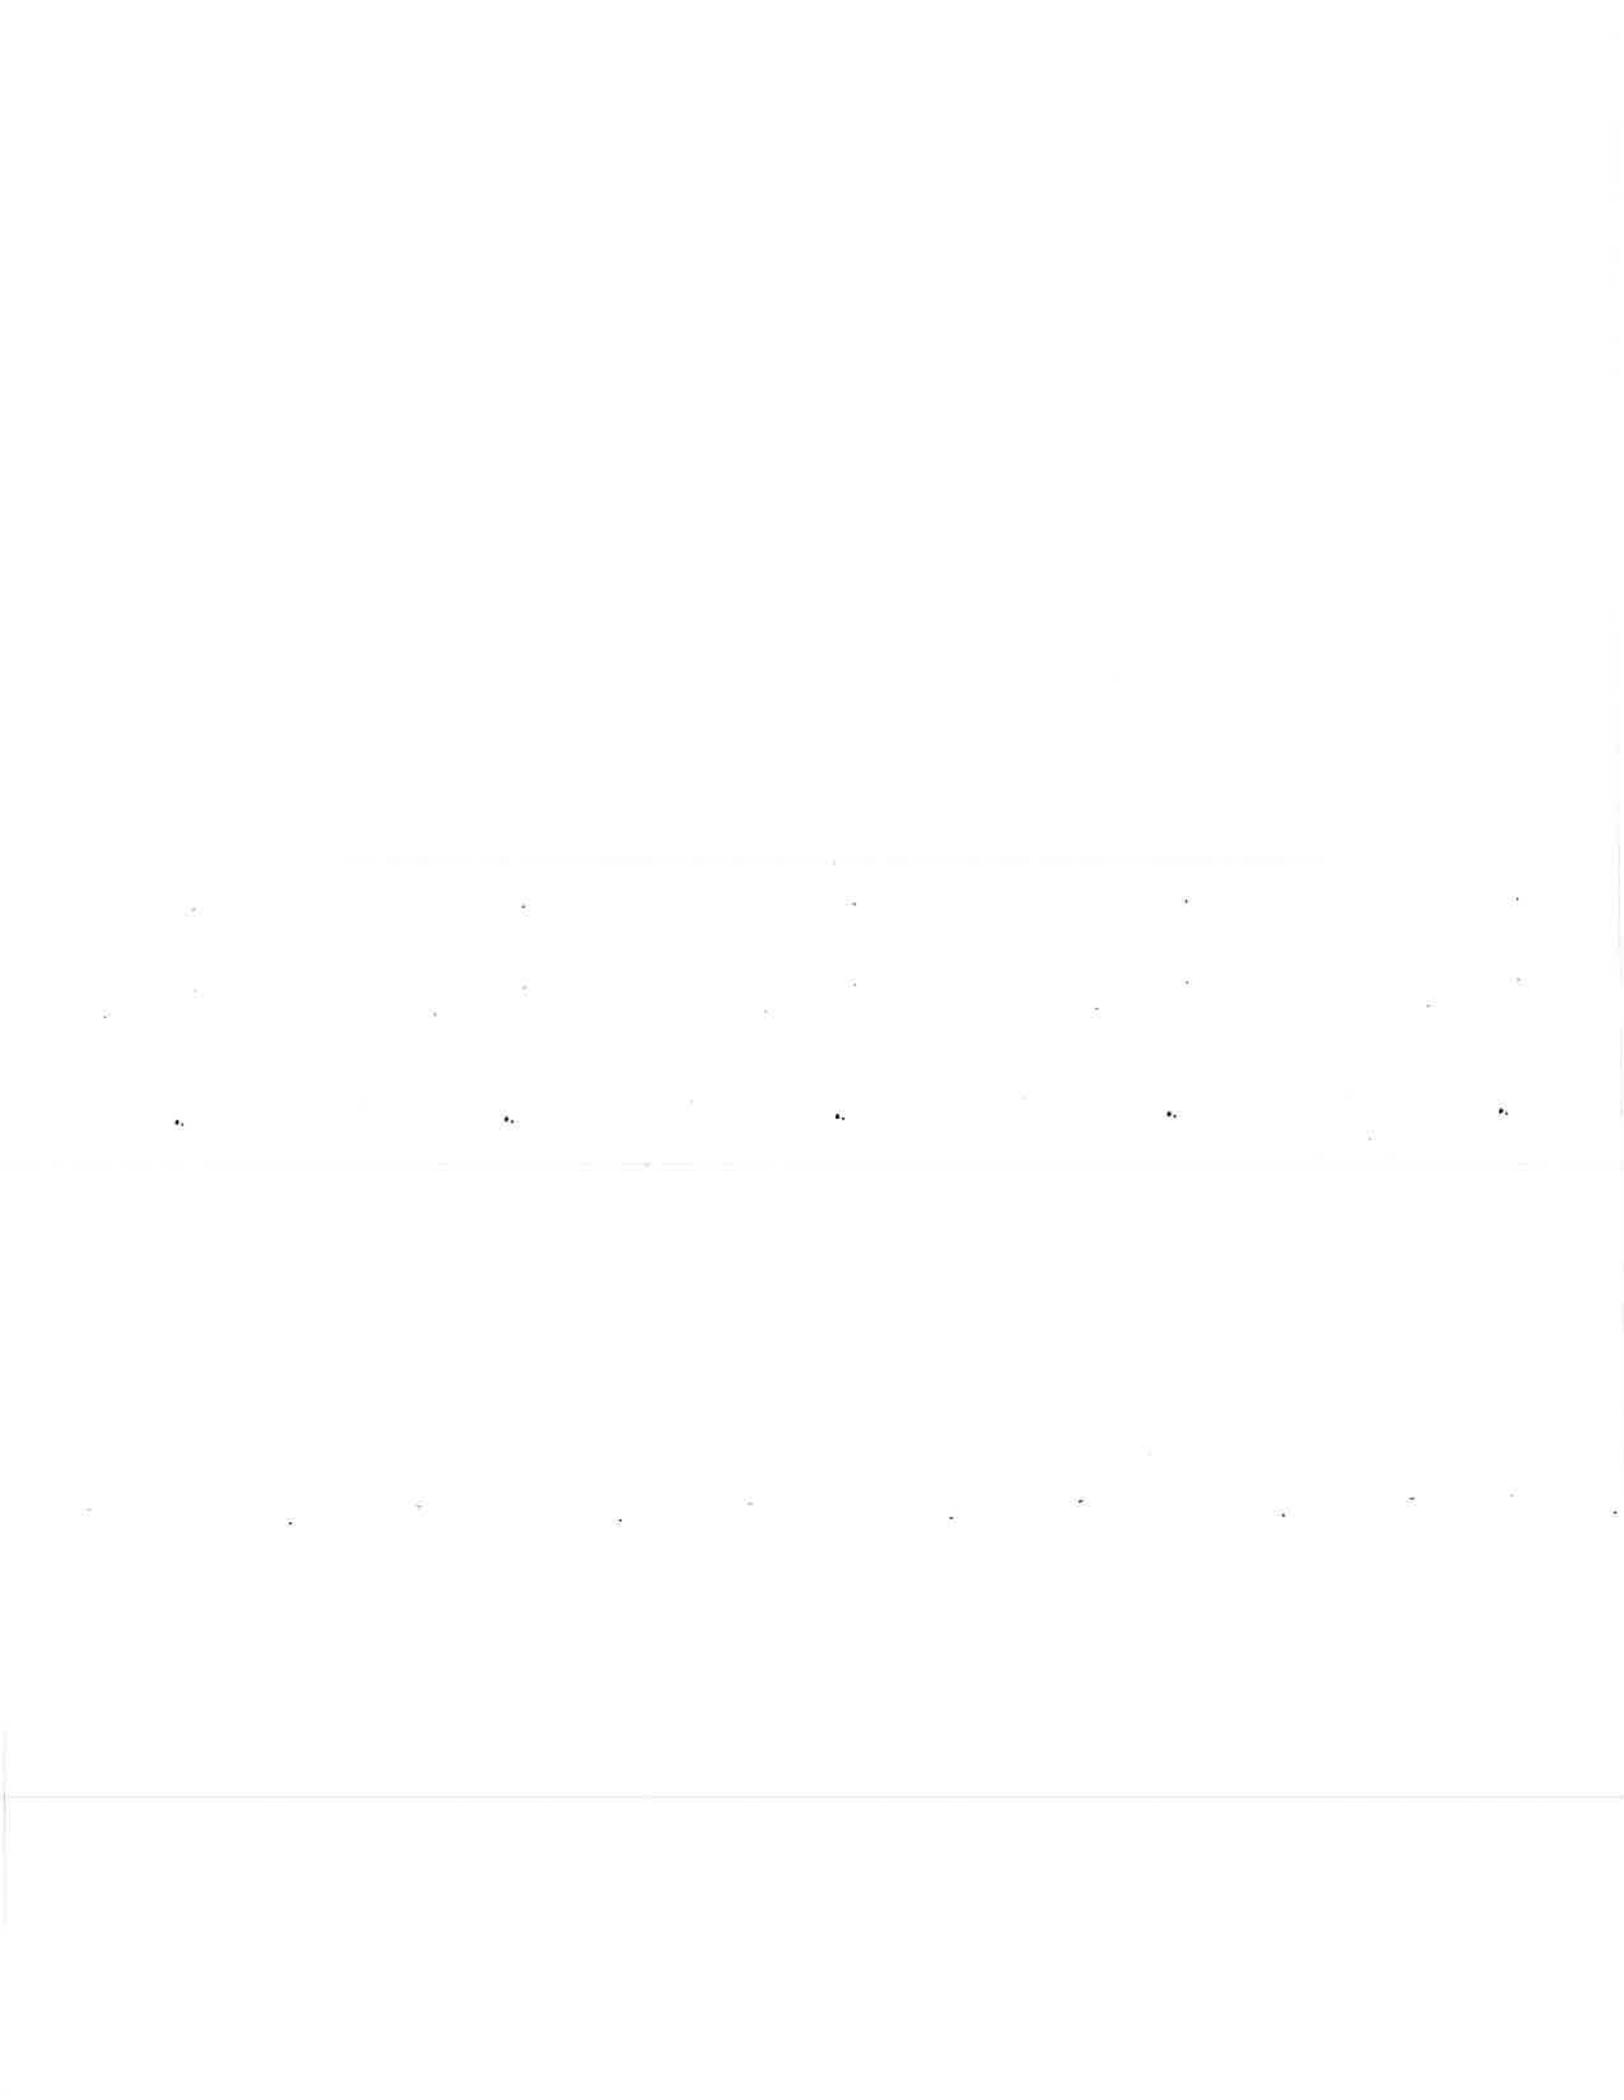

It is respectfully requested that you, as the election officers of the state and county, immediately contact the Salt Lake County Democrat Party and inform them that their election is not valid, and will not be recognized as it fails to meet the standards set forth in Utah election code. Based upon the foregoing, we demand you not certify the name of this replacement candidate to be printed on the regular general election ballot for that county clerk’s county as required in UCA 20A-5-409.

Transparency and fairness in elections must be preserved and we will do everything we can to ensure that the laws of the State of Utah are followed at all times and especially in regard to Utah Senate District 9.

Respectfully,

Rob Anderson, Chair of the Utah Republican Party

Scott Miller, Chair of the Salt Lake County Republican Party

Hello Bart,

I believe the current incorporation cleanup bill makes that fix as we were very aware of that problem from previous incorporations. If you refer to lines 1048-1051 of SB35, the bill aligns the declaration dates with the declaration dates for whichever election is happening that year. So in an general election year those declarations would take place in March along with all other candidates, and in a municipal election year those declarations would take place in June along with all other candidates. If anyone reads that code section differently please let me know.

All the best,
Justin

Dear Senator Harper and Representative Seegmiller,

Thank you for sponsoring SB 33 to improve the incorporation process for cities and towns. Justin Lee and I testified in support of this during Interim.

One area of which we were not aware at the time was a problem with the declaration of candidacy for a new town's elected officials. Unlike for all other municipal elected officials, 10-2a-305.2. requires that:

"... each individual seeking to become a candidate for mayor or town council of a town incorporating under this part shall, within 45 days after the day of the incorporation election

under Section 10-2a-304, file a declaration of candidacy with the clerk of the county in which the future town is located."

This creates logistical problems with the dates of the canvass and of the required public hearing following the election. Salt Lake County Clerk Sherrie Swensen faced this problem after the Town of Brighton incorporation election in November.

The easiest way to address this would be to set the candidate filing period to match that of other municipal candidates, in June of the municipal election year. I see no reason it should be different and every reason it should be the same.

Is it possible to amend SB 33 to provide this fix?

Respectfully,

Bart Barker

millcreek.us

March 12, 2020

Today I declared a State of Emergency for Millcreek as a preemptive precaution against a Coronavirus (COVID-19) outbreak in our city. While we have yet to confirm the spread of the virus here, we have received information that students in several of our Millcreek schools may have been exposed to the virus, thus expanded precautions are warranted to ensure we do everything possible to contain the spread of the virus or slow it down to protect our healthcare system from being overwhelmed.

The Declaration of a State of Emergency may enable Millcreek to seek reimbursement for certain expenses attributed to addressing the health and safety of our community. It also sets the stage for the exercise of further emergency powers to establish curfews, enact shelter-in-place protocols, and/or limit gatherings and social events should that become necessary to protect public health. The state has recommended that all gatherings of more than 100 people be canceled and that residents over the age of 60 should not gather in groups of more than 20. Millcreek is working closely with state and county authorities, including the Salt Lake County Unified Command, which is the county's emergency management system, to continue to provide government resources to address this developing situation.

I urge all Millcreek residents to become informed and practice hand washing, sound hygiene, social distancing, and avoidance of unnecessary trips and travel to prevent the spread of this virus. Older adults and particularly those with heart or respiratory ailments or compromised immune systems are most vulnerable. If you develop symptoms of the virus (usually a temperature, dry cough and difficulty breathing), please stay home and contact your health care provider by phone or electronic means for instructions. Do NOT present yourself at a clinic or hospital without providing advance notice lest you further spread the virus and infect health care workers or first responders, whom we cannot afford to get sick. Further, please do not go to work, school, shopping centers, or other public places where others can be exposed if you develop symptoms.

If you would like to learn more about the virus and stay updated on current happenings, please visit millcreek.us/389/Coronavirus-Information. We have compiled information from local and nationwide organizations that are closely monitoring the virus. Our sources include the CDC, Johns Hopkins, the Salt Lake County Health Department, and more. You may also call the Utah Coronavirus Information Line at 1-800-456-7707 for more information.

With your cooperation, we can and will overcome this challenge. We ALL need to work to prevent the spread of this disease and protect our community. Thanks for your assistance.

MILLCREEK EMERGENCY PROCLAMATION
No. 1 of 2020
PROCLAMATION DECLARING A LOCAL EMERGENCY

Pursuant to Utah Code § 53-2a-208(1)a and 53-2a-209(1) the Mayor of Millcreek has power to declare a local state of emergency for Millcreek.

Millcreek Code of Ordinances § 2.86 authorizes the Mayor to declare a state of emergency when the Mayor finds that the City or any part thereof is suffering from or is in imminent danger of suffering an emergency or disaster.

Governor Gary Herbert signed an Executive Order on March 6, 2020, in which he declared a state of emergency in Utah due to the global outbreak of COVID-19. Salt Lake County Mayor Jennifer Wilson declared a state of emergency for Salt Lake County also on March 6, 2020 due to the COVID-19 virus.

The Salt Lake County Unified Command and Salt Lake County Board of Health recommends that the Mayor declare a state of emergency.

The global outbreak of the COVID-19 virus creates a state of local emergency under Utah Code and City Code.

The Millcreek Mayor finds that these conditions create a state of local emergency as contemplated in Utah Code § 52-2a-208(3) and Millcreek Code of Ordinances § 2.86.030 and 2.86.050 and makes the following proclamation declaring a local emergency:

1. Nature of the Local Emergency. A local emergency exists for Millcreek due to COVID-19 and this local emergency threatens and could affect the entirety of Millcreek.
2. Area that is Affected or Threatened. The area that is affected or threatened is the entire area of Millcreek.
3. Conditions which caused the Emergency. The conditions which caused the emergency is the outbreak of the COVID-19 virus and the suggestion that one or more Millcreek residents may have come in contact with a person who has tested positive for the virus.
4. Emergency Powers and Operations. The emergency powers and operations of Millcreek are hereby invoked and Millcreek's personnel and resources are ordered and authorized to perform all functions authorized by federal, state, and local law to address this local emergency.
5. Term. This proclamation shall take effect immediately and will be ongoing for thirty (30) days unless an extension is authorized by the Millcreek Municipal Council by resolution.
6. Assistance. Millcreek is authorized to request all assistance available with respect to this local emergency from all federal, state, and local sources and authorized to activate all mutual aid agreements.

MILLCREEK EMERGENCY PROCLAMATION

No. 1 of 2020, page 2

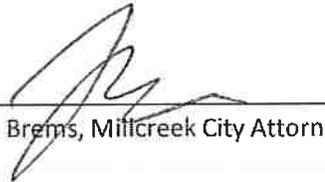

7. Filing and Dissemination. This proclamation will be filed with the Millcreek Recorder and will be delivered to the State of Utah and Salt Lake County and will be disseminated to local media.

Dated this 12th day of March, 2020

Jeff Silvestrini
Mayor

MILLCREEK EMERGENCY PROCLAMATION
No. 2 of 2020
PROCLAMATION DECLARING A LOCAL EMERGENCY

Pursuant to Utah Code Ann. § 53-2a-208(1)(a) and 53-2a-209(1) and Millcreek Code of Ordinances Section 2.86.050, the Mayor of Millcreek hereby declares a local emergency.

On September 7 and September 8, 2020, parts of the State of Utah, including Millcreek experienced a severe windstorm. As a result of the severe windstorm, many locations in the City experienced serious property damage, including downed trees and power lines, damage to homes and vehicles, damage to sidewalks, road closures, loss of power, and other property damage.

This windstorm creates a state of local emergency under Utah Code and Millcreek Code.

Pursuant to Utah Code Ann § 52-2a-208(3) and Millcreek City Code 2.86.050, the Millcreek Mayor makes the following proclamation declaring a local emergency:

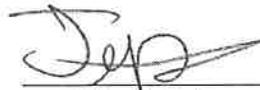

1. **Nature of the Local Emergency.** A local emergency exists for Millcreek due to the referenced windstorm and this local emergency threatens and affects the entirety of Millcreek.
2. **Emergency Powers and Operations.** The emergency powers and operations of Millcreek are hereby invoked, and Millcreek's personnel and resources are ordered and authorized to perform all functions authorized by federal, state, and local law to address this local emergency.
3. **Warming Centers.** In order to immediately provide warming centers for individuals experiencing loss of power during this local emergency, the Mayor waives any gathering restrictions, land use regulations, or prohibitions on gathering at the Millcreek Community Center located at 2266 East Evergreen Avenue, Millcreek, Utah or any other location subsequently identified by the Mayor. During this local emergency, the Mayor authorizes donations of any volunteer services and time to assist in the staffing and support of the temporary warming shelter located at the Millcreek Community Center.
4. **Post Emergency Clean-Up.** After the immediate emergency of the windstorm ceases, the Mayor authorizes volunteers to begin post-emergency clean-up of debris and fallen trees and will likely exercise additional emergency powers to identify locations to collect and dispose of the debris and fallen trees.

5. **Term.** This proclamation shall take effect immediately and will be ongoing for thirty (30) days unless an extension is authorized by the Millcreek Council by resolution.

6. **Assistance.** Millcreek is authorized to request all assistance available with respect to this local emergency from all federal, state, and local sources and authorized to activate all mutual aid agreements.

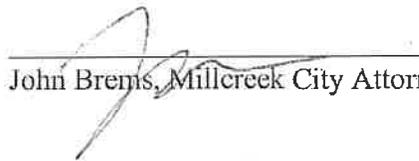

7. **Filing and Dissemination.** The Council will be notified of this proclamation and this proclamation will be filed with the Millcreek Recorder and will be delivered to the State of Utah and Salt Lake County and will be disseminated to local media.

Dated this 9th day of September 2020.

Jeff Silvestrini, Mayor

Thanks Sherrie. I know Ashton Miller reached out to our office about doing an initiative around straight party voting, but we did not request any stats on this. Interesting information though.
