Security Awareness Series Learning Curriculum

WisVote security has always been a priority for the Elections Commission, but there is always more to be done. Our focus expands to include providing training resources to you, the clerks, in support of election security. Wisconsin's decentralized elections provide a unique challenge for our election security plans. Each municipal and county user is a potential point of entry and one lapse leading to a compromise puts all of us at risk. No one wants the source of a compromise to be traced back to them and Commission staff want to provide the information necessary to avoid this from happening. We hope this series accomplishes this task.

	Training Videos	Run times	
1	Securing WisVote - The Basics	**9.5** mins	☐
2	WisVote Access Policy	**9** mins	☐
3	Phishing Facts	**18.5** mins	☐
4	Password Protocols	**15** mins	☐
5	Browsing Safely	**16.5** mins	☐
6	Computer Safeguards	**14** mins	☐

MADISON, WI – The Wisconsin Elections Commission (WEC) has received an award from the U.S. Election Assistance Commission (EAC) for Outstanding Innovations in Elections for its cybersecurity training program series intended to better secure the statewide election system.
