Interesting . . . Trump margin of "defeat" in 4 states occurred in 4 data dumps between 1:34-6:31 AM. Statistical anomaly? Fraud? Look at the evidence and decide for yourself.

Senator Paul steps up. Thank you. Now we need to hear from the rest of the Republicans.

The question answers itself

The perps are probably dead, killed after they did the deed

These are serious people to attempt something this big in this day and age when virtually all their cell phone traffic and internet usage are traceable

Offing some people in the process wouldn't be a problem for them at all

We all have to know that's why HRC advised Biden not to concede, "no matter what" [the early returns looked like].

And all happened after counting was stopped and all the Republican poll watchers were sent home. Except for those few pesky fanatics that took pictures of the unmarked boxes and trash bags with ballots that "magically" appeared after the polls closed. Nothing to see here. Move on.

C'mon man.

Not much going on here in parallel at least for these 4 biggest GLITCHES. It doesn't take a genius to suspect that this was handled from some central command point.

Maybe in Germany.

Maybe in Frankfurt.

Fingers crossed that we really do have that server or server farm.

Some people do not see statistics as evidence in this matter of elections, but a good example is in medicine.

Every drug/medicine has a battery of statistics that are pro v con n some mixed.

The democrat party, under the guise of COVID, sent out millions of unsolicited mail-in ballots.

Whether those ballots were returned or not, the Rats strategically manufactured millions more ballots with no post mark, no signature, no address etc. The ballots were delivered in the dead of night while no one was looking. The ballot was placed into the Joe Biden column and then the envelope destroyed, leaving no trace of chain of custody.

This is why the Rats were preventing observers from inspecting the ballot envelopes. Theft in plain site. A recount would just be counting the same invalid ballots.

Now how can any impartial judge call this a fair and honest election?

If the Supreme Court does not nullify the vote results from the six contested states then elections from this day forward will be forever meaningless.

There were a few Freepers who saw this happen in real time and posted about it election night. I wasn't one of them, and I wish I'd have bookmarked their posts. They were all over it.
