Darren,

I'm sorry to trouble you. It looks like we have identified the issue, and it was our touchpad vendors end. They associated the wrong Split Ballot ID with the wrong precincts, and so while their software prints the correct "Ballot Style", it prints the wrong Split Ballot ID, which is what the barcode is generated from. That is why our summary looks fine, but our Precinct by Precinct is completely messed up. We may follow up with you later, but we're shelving this issue for the night. Thank you for all your help thus far. Hope you have a great election day!

**EXTERNAL email: Exercise caution when opening.**

Good evening,

I have the files downloaded and I have already moved it up to our Tier 3 Support.

Thanks,

Subject: Precinct by Precinct Results

Importance: High

Darren,

As we discussed on the phone, I am seeing the following issues. Our precinct by precinct results for our "In-Person Early Voting" reporting group are wildly incorrect, we have some precincts that are showing over well 10,000 ballots cast when no precinct has more than 8,000 voters. We have other precincts that are showing 0 ballots cast. I don't understand what could be causing this, please escalate this as high as it can be escalated. I am currently uploading a backup of my election, the Results Summary that shows the Precinct returns, and a copy of my Ballot on Demand File. Please let me know who I should reach out to about this, and if there is anything you can find that is causing this.
