Subject: Ballots printing incorrect

Urgent: High

Attachments: BOD file.jpg (1.33 MB)

We just discovered a huge problem.

The attached is a ballot printed from our Touchpad. It's listing the precinct **490**, ballot style 72. The ballot code at the top has 472 which is for precinct **402**, ballot style 72. We're trying to determine how the correct precinct/ballot style are being printed with the incorrect ballot information?

Can I get a call as soon as possible?
