SENTIO™ Ballot Printing System

RUNBECK
ELECTION SERVICES

SENTIO BALLOT PRINTING SYSTEM®

Accurate, Efficient and Secure—ready to print for Elections

Runbeck's Sentio Ballot Printing On-Demand System provides the ability to produce accurate ballots onsite and on-demand in varying quantities to be cost-effective—from individual early voting or counter ballots to large batches of mail ballots. This unparalleled solution is configured for the latest industry printer changes!

Smart Software System

Sentio features enhanced software optimized for top performance. This advanced technology significantly reduces print time. The proprietary software was developed by Runbeck with a user-friendly interface for trained users. It pulls the correct ballot for each voter to reduce human error.

New Universal Printer Options

Our newest, advanced printers offer a wide range of capabilities including printing up to 22" duplexing and 4 color CMYK. The Sentio Printing Solutions are vendor-agnostic and produce on-demand accurate and tabulatable ballots with a full audit trail.

YOUR SENTIO FEATURES

✓ **ACCURATE:** Connects to most VR Systems to print voters' accurate ballots

✓ **EFFICIENT:** Eliminates human error in selecting and handling ballots

✓ **SECURE:** Multi-layered security protects against unauthorized use

✓ **ECONOMICAL:** Generate only the quantities specified

✓ **VERIFIABLE:** Full audit trail of all requested ballots

✓ **EASY-TO-USE:** Specifically designed for use by non-technical operators

✓ **SAFE & MOBILE:** The purpose-built locking cart is ideal for Vote Centers
